Worktitude For Light

Lamp is work and attitude,
we are **Worktitude for Light**.

We advise, we design, we produce and make your technical lighting projects possible. For 50 years, Lamp has maintained its essential commitment: to bring to life functional and customized solutions for our customers' lighting challenges, adapted to any architectural project around the world.

Working for light that works

Light is our DNA

We have been turning our **clients' lighting challenges into reality for 50 years**. We combine **experience, know-how and continuous evolution**, from our manufacturing process to our consultancy services.

International vision, local commitment

We are present **in over 70 countries** thanks to **our factory and Terrassa HQ**, as well as our **8 subsidiaries**.

Team

Engineers, designers, technicians and a myriad of **professional profiles work together** on your next project.

Co-Creation

At Lamp we deliver value to your project by **developing tailor-made lighting solutions to suit any application**.

Light is our DNA

We have been **turning our clients' lighting challenges into reality** for 50 years. We combine **experience, know-how and continuous evolution**, from our manufacturing process to our consultancy services.

We have implemented the latest technological advances into our lighting solutions, always focused on the commitment to light quality that each project needs.

We support and defend good lighting. And, as a result, we created the Lamp Awards, to reward creativity, innovation and sustainability of lighting projects.

International vision, local commitment

Our international perspective makes it possible for us to offer lighting solutions that can address projects comprehensively **while maintaining our commitment to the local market** thanks to the presence of our teams in the different subsidiaries and sales offices.

We think globally, solve challenges with local commitment and follow-up.

We are **present in over 70 countries** thanks to our factory and Terrassa HQ, as well as our 8 subsidiaries.

Team

Engineers, designers, technicians and a myriad of professional profiles work together on your next project.

We design and manufacture all our portfolio's products in our HQ in Terrassa, Barcelona (Spain).

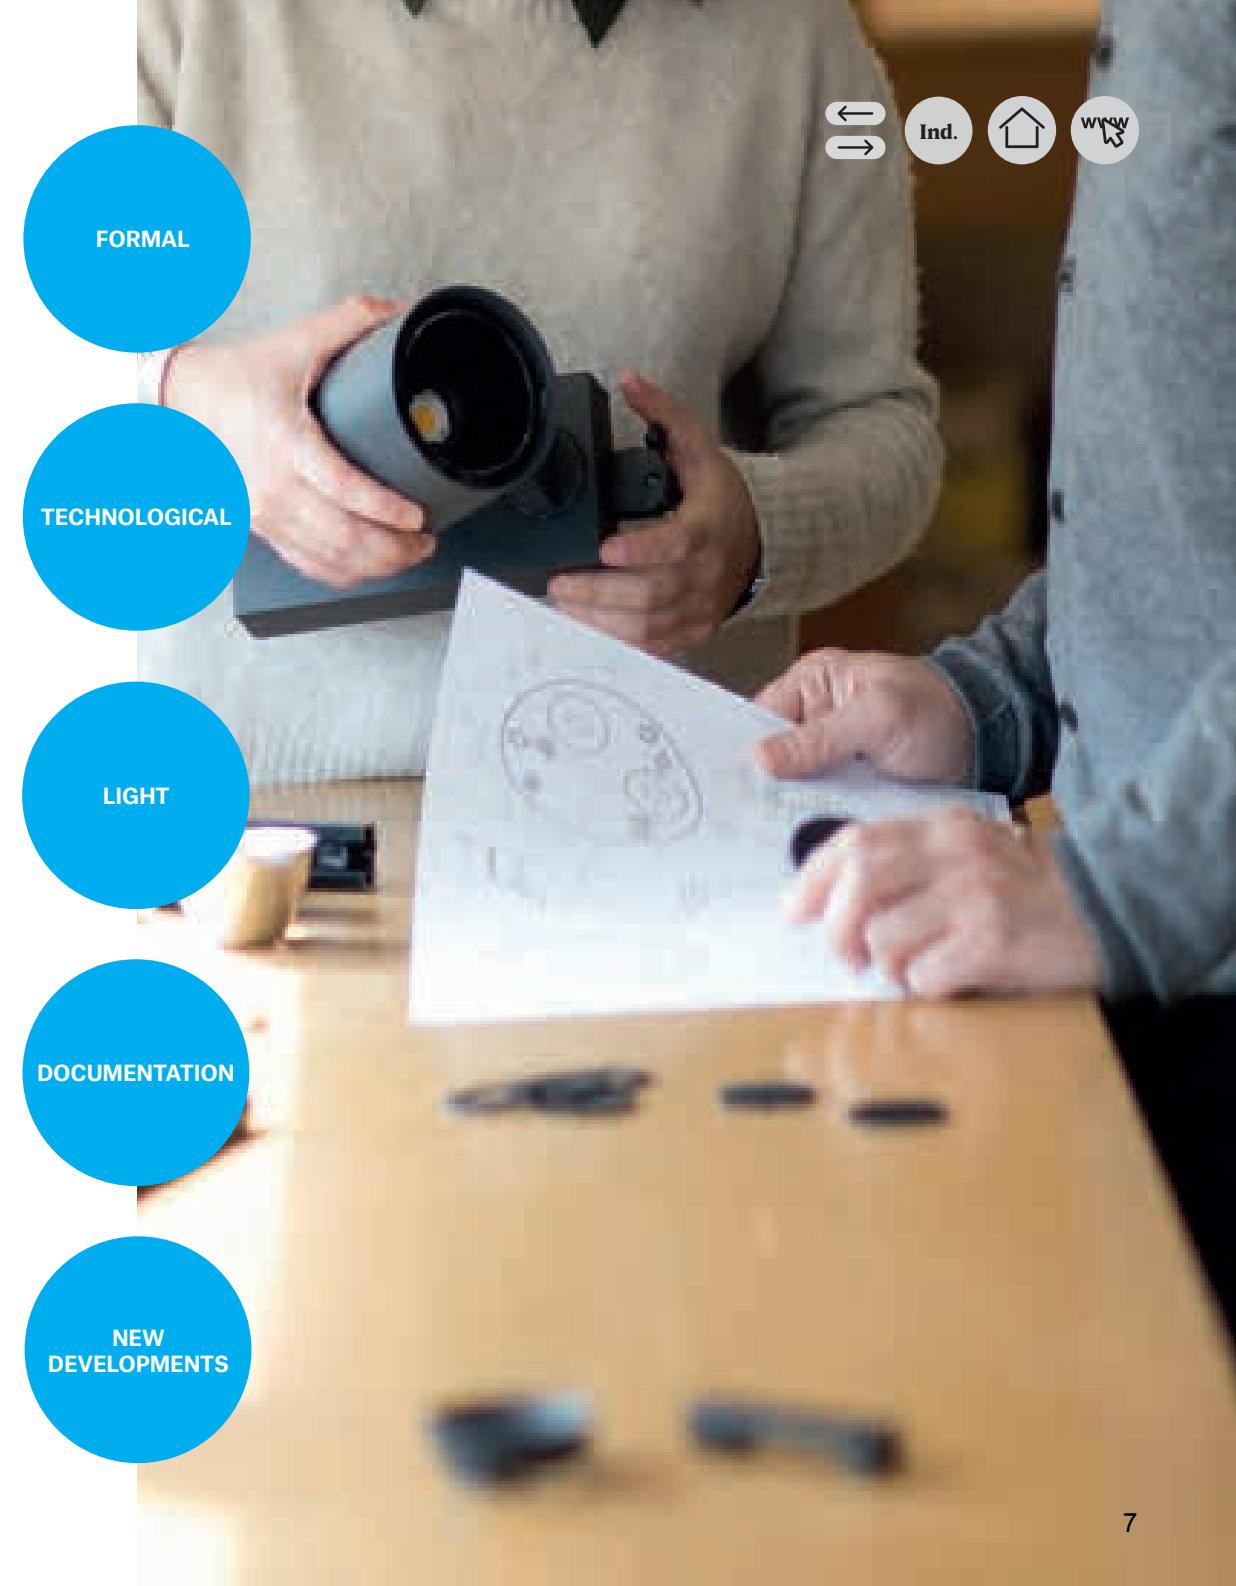

Lamp's own designs coexist with creations by prestigious collaborators in our catalogue.

We work in **partnership** with experts in fields such as sustainability, acoustic conditioning,...

Co-creation

At Lamp **we deliver value to your project by developing tailor-made lighting solutions to suit any application.**

Our co-creation service ranges from adapting products currently available in the catalogue to custom made-to-measure solutions on a client-by-client basis.

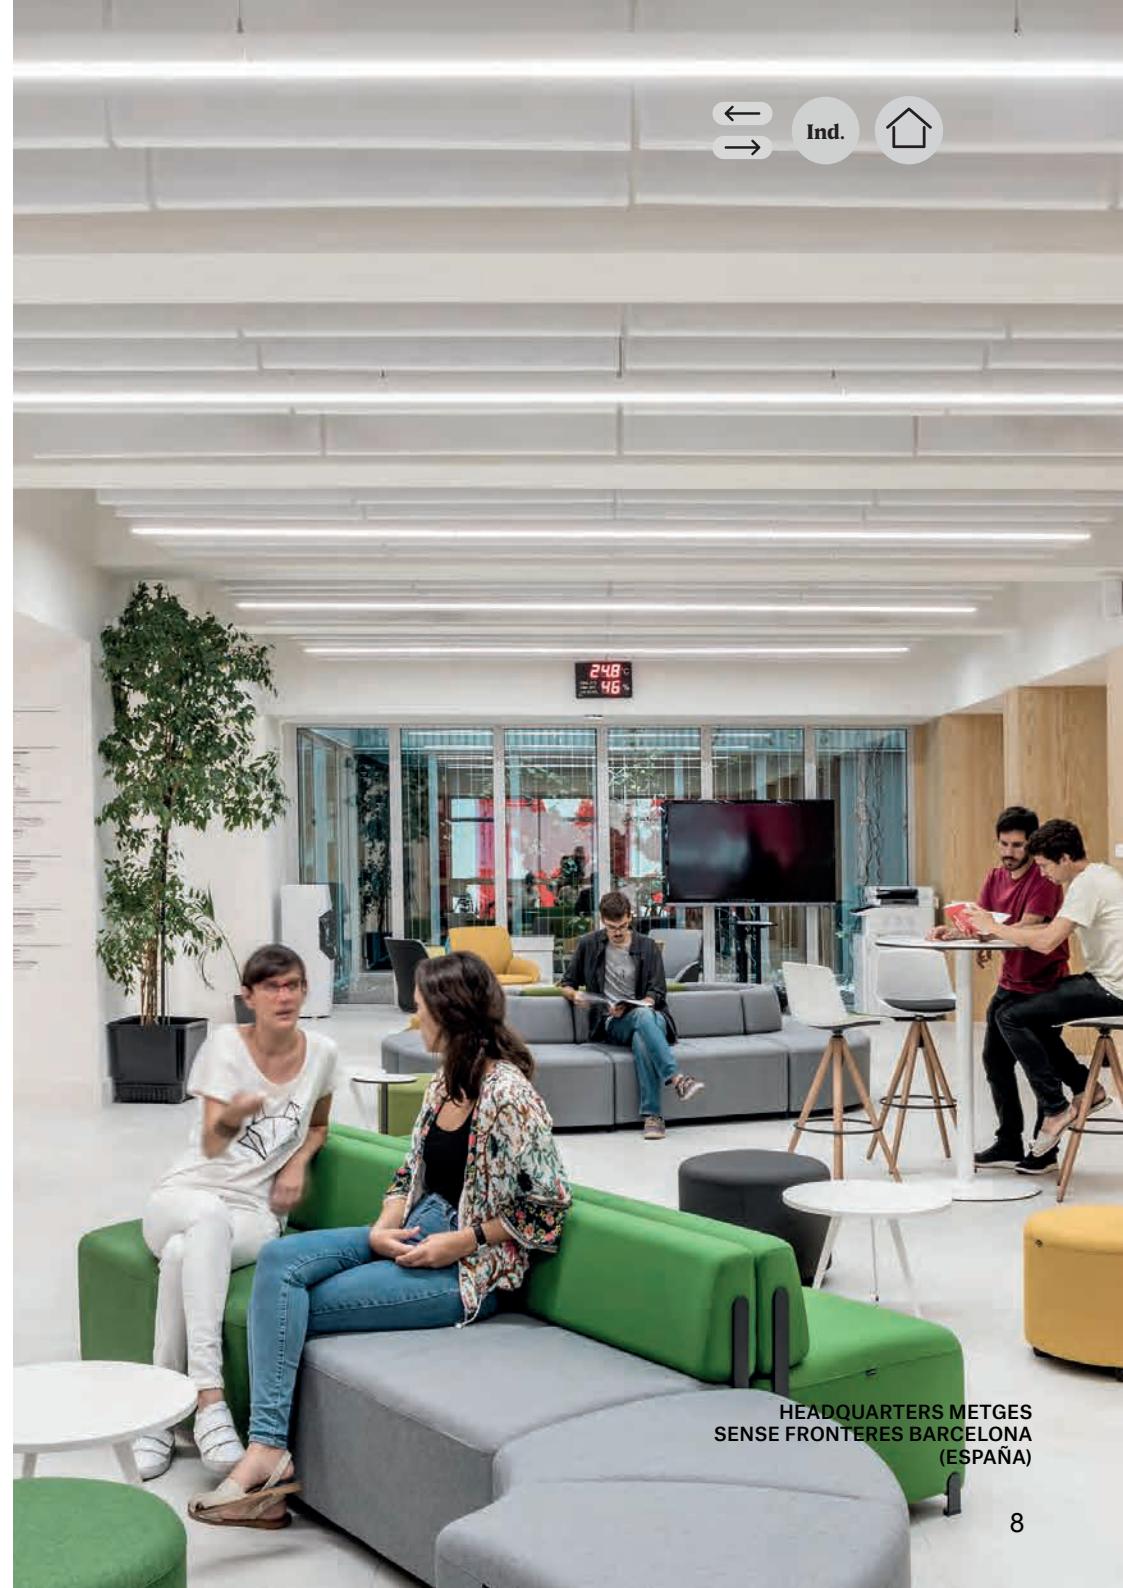

WORKTITUDE FOR WELLBEING

We understand **lighting as a fundamental element for improving people's well-being**, analysing **the visual and non-visual effects of light**.

We believe that light is born in each luminaire, but lives in the space it illuminates and in the person who works or lives there. Whether it is a product, a service or a project, we build on and for the users, taking into account the physical characteristics of the space and the tasks that will be carried out in it.

Worktitude for Wellbeing

Visual comfort

Luminaires with high visual comfort

Specially designed for users to perform concentration and work tasks, with medium-high lighting levels and high comfort requirements, such as offices, classrooms, health and wellness spaces.

Luminaires with a low degree of glare by means of:

- Tech ultracomfort diffuse s (UGR<12) and Opal confort diffuse s (UGR <16)
- Optical options and high degree of shielding (UGR <14)
- Direct-Indirect light distribution

Photobiological risk

For those spaces with high visual comfort requirements due to a more sensitive type of user, such as children or elderly people, as well as spaces where users are exposed to artificial light for long periods, such as kindergartens, educational centres, hospitals, laboratories, offices, senior residences, etc., using luminaires classified as "**Exempt from photobiological risk - Group 0**" according to the **UNE 62471 standard** is recommended.

+info

+info

Technological Gradient

Implementing a Technological Gradient according to the needs of the project:

Standard LED

Dynamic Lighting

Technology that enables colour temperature variation (2700-6500 K) by selecting the most suitable colour temperature for the lighting level.

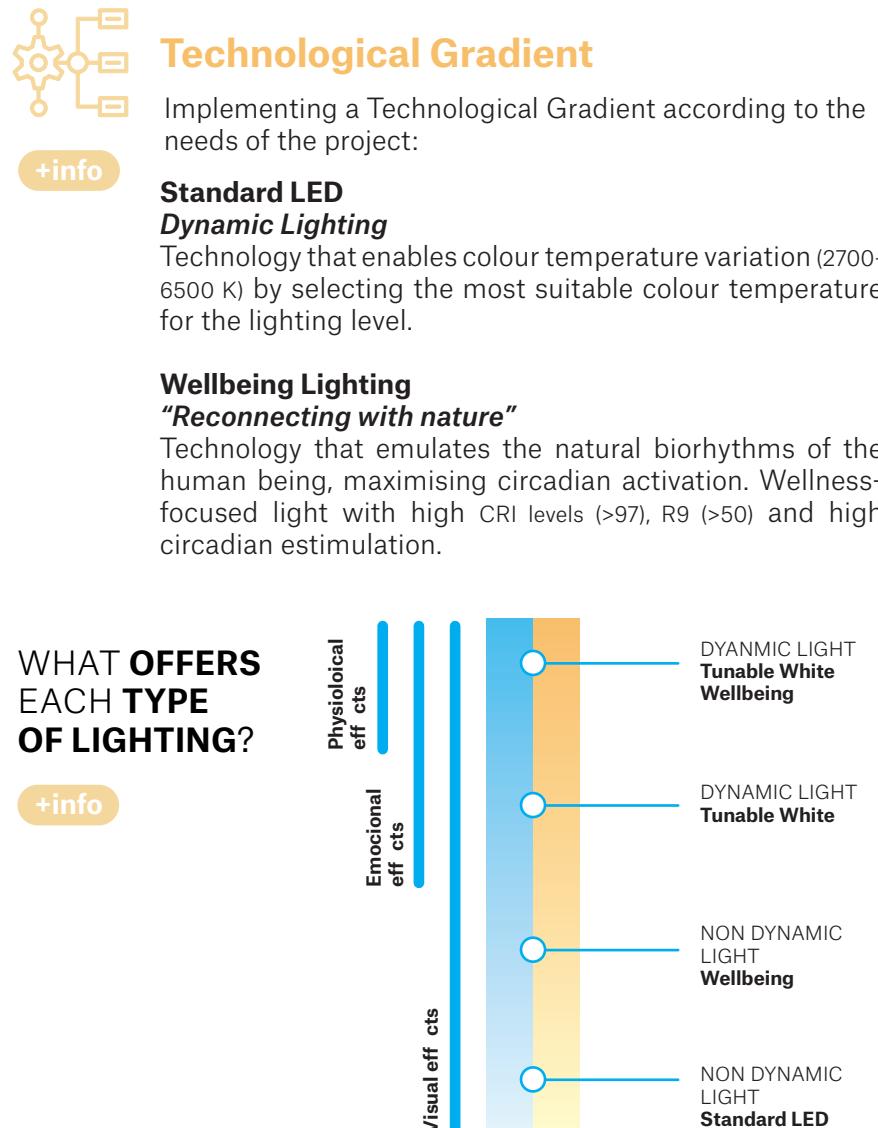

Wellbeing Lighting

"Reconnecting with nature"

Technology that emulates the natural biorhythms of the human being, maximising circadian activation. Wellness-focused light with high CRI levels (>97), R9 (>50) and high circadian stimulation.

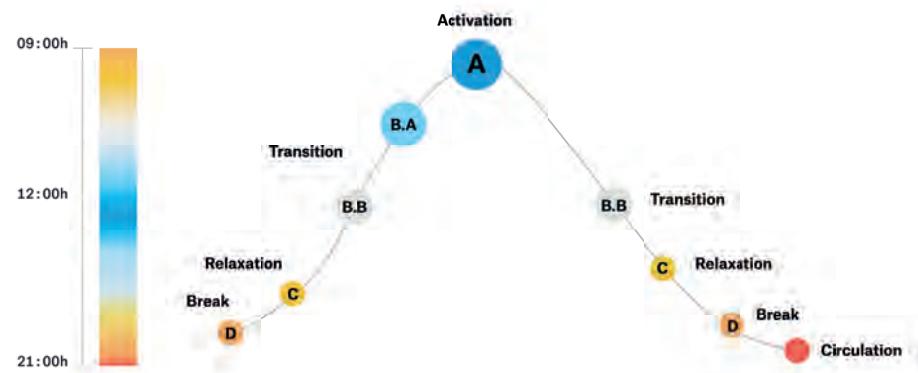

WHAT OFFERS EACH TYPE OF LIGHTING?

+info

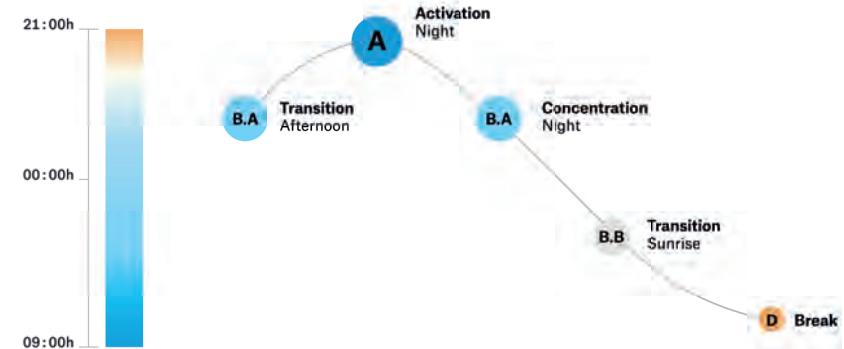

Design of lighting itineraries

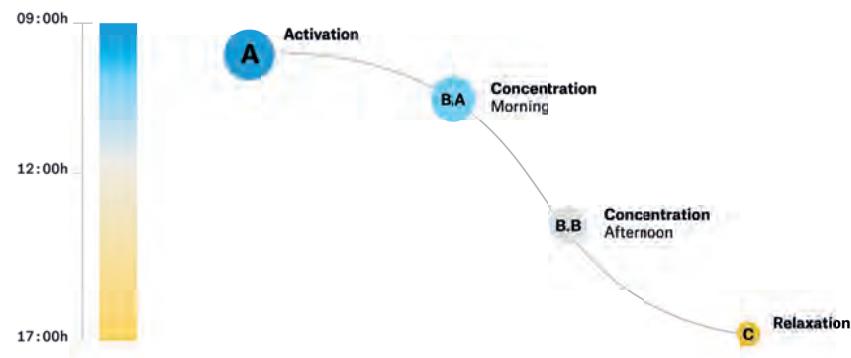

Hospitals (Rooms)

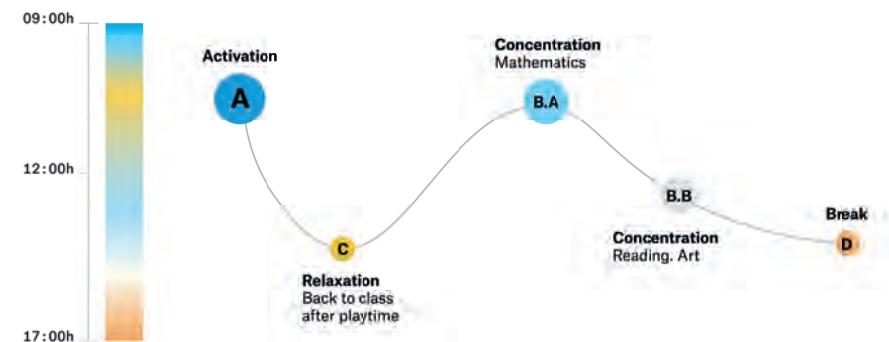

Hospitals (Workers)

Office

Schools

WORKTITUDE FOR LIFE

We encourage projects that have a **positive impact on the environment and promote a more sustainable lighting industry.**

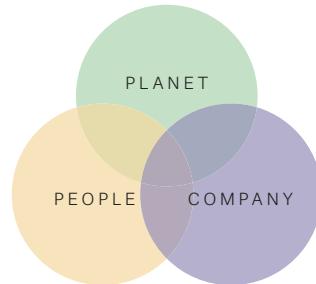

We believe that bringing a space to life requires the shared effort of many companies and professionals working responsibly with the **aim of reducing the environmental impact along the entire value chain.** We do our bit by providing realistic, efficient, sustainable solutions that are in line with the current climate reality.

Sustainability committee

Stable committee incorporated into the company's organisation chart, responsible for **managing the sustainability plan, collecting proposals and prioritising actions.**

Equality and equity plan

It is part of the **Target Gender Equality 2022-2023** accelerator programme to boost the **contribution to SDG 5 for gender equality.**

Training and environmental awareness plan

Aimed at our teams, as well as external dissemination actions.

Sustainability plan

3-year plan, articulated in three axes:

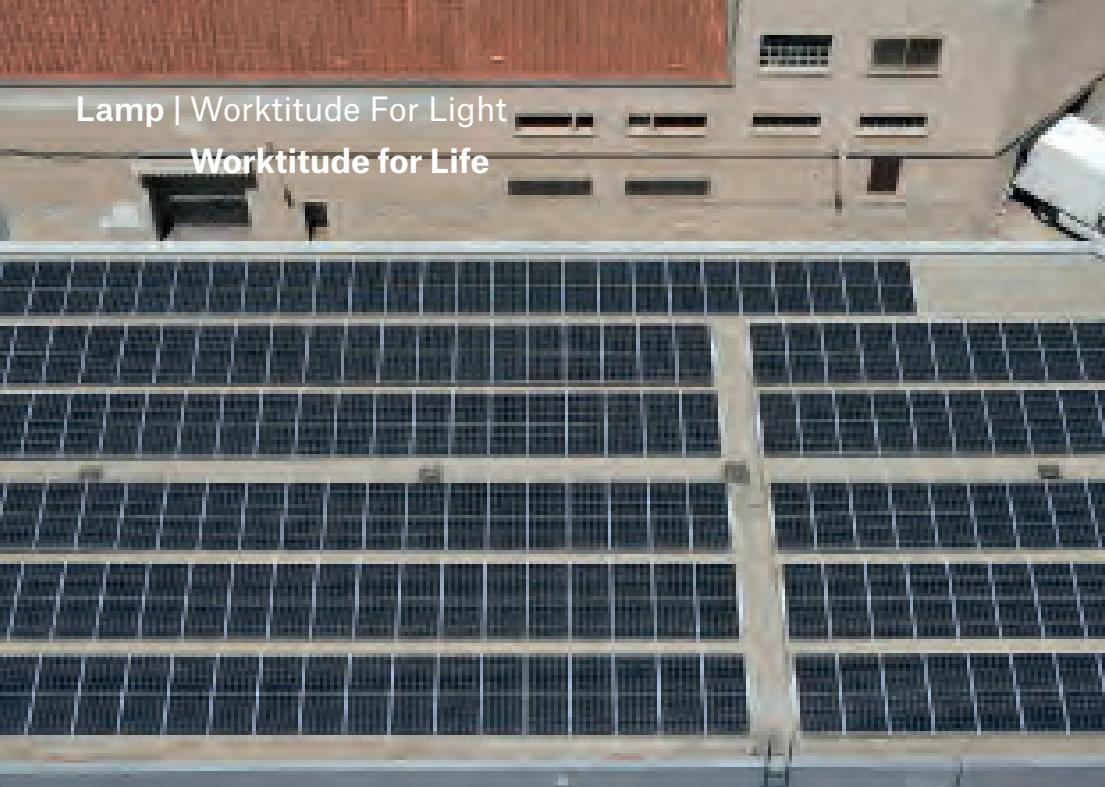

- **Environmental** (Planet).
- **Social** (People, health and wellbeing).
- **Economic** (Company, profitability and reputation).

Public commitment and transparency

- **Adherence to the UN Global Compact** as a public commitment to align with the **Ten Universally Accepted Principles** in the areas of human rights, labour standards, environment and anti corruption.
- **Support of the UN goals** embodied in the **Sustainable Development Goals (SDGs)**.
- Commitment to the preparation and publication of the **Progress Report (2023)**.

Reducing the environmental footprint

Prioritising actions to help us **reduce CO2 and other GHG** (Greenhouse Gas) emissions, both direct and indirect.

- Lamp's GHG calculation report** contemplating its **Scope 1,2 and 3 emissions in 2022.**

[+info](#)

Waste management

Plan for constant improvement in waste management, such as the reduction of plastic packaging, optimisation of packaging by eliminating expanded polystyrene elements,...

Energy transition

- Use of renewable energies thanks to the **installation of solar panels in HQ, which means 40% self-consumption.**
- Commitment to the progressive electrification of the vehicle fleet.

Relationship with suppliers

- Prioritisation of local suppliers with sustainability policies and carbon footprint reduction.**
- Optimisation of transport routes.
- Strengthening relationships to improve the social reality of the environment.

Certifications and standards

- ISO 9001 and 14001 certifications.
- GOLD classification by Ecovadis ranking, which **places us in the top 3% of companies with the best performance in terms of social responsibility.**
- Progressive EDP management of our products based on LCA (Life Cycle Assessment).
- Use of recycled aluminium with ASI seal.

+50%

of the references that make up our catalog have **Environmental Product Declarations.**

EPD

Measuring impact

- Implementation of software to **manage and report on all sustainability and CSR activity.**
- Progressive LCA** (Life Cycle Assessment) of our product families.

+info

Life cycle analysis (LCA)

Sample of the **environmental performance of the product expressed in KgCO₂** according to LCA phases.

Ecodesign

Implementation of design and conceptualisation strategies to **promote the circularity of our products and reduce their environmental impact.**

Migration to the use of recycled materials such as recycled aluminium, rPET, rCork, and/or biodegradable materials,...

Research and development

R&D projects developed by our own internal teams and external experts to **develop innovation that minimises environmental impact** (new materials, additive manufacturing, packaging optimisation, etc.)

Lamp | Worktitude For Light

Worktitude for Innovation

WORKTITUDE FOR INNOVATION

We promote and adopt innovation projects aimed at constant improvement in a transversal way, understanding that **innovation is a systemic and systematic process**.

We anticipate the needs of architects, lighting designers, engineers and interior designers to make their projects a reality and give light to the future, **creating lighting solutions that respond to new ways of living**.

Working groups

We create **interdisciplinary working groups**, using agile and self-managed methodologies:

- Sustainability Committe
- Innovation Committe

Application segments

Depending on the **different contributions that light brings to the user's experience** in each space, we redefine the specific application segments.

Collaborative ecosystems

We develop internal-external **collaboration ecosystems**:

- R&D research and new materialities
- Partnership with adjacent industries

Your Light

We created an *On Demand* **digital lighting consultancy service**, integrated with the purchase and acquisition process of luminaires.

The Right Light, Your Light

2018

Open For Innovation

Make Lamp a **user-centric organisation** by generating value propositions around **innovative lighting application**.

Implementation of the **Design Thinking, Co-Creation and Visual Thinking methodology** to understand in depth the social needs and requirements, through the NOMADIC project that collected 11 patterns through more than 40 interviews to 10 different professional profiles in more than 10 cities in 5 different countries, carried out by a transversal innovation acceleration group.

2019

2020

Transformation for Innovation

Internal transformation to prepare the organisation to embrace **new business opportunities in the digital age**.

2022

Transformación for circularity

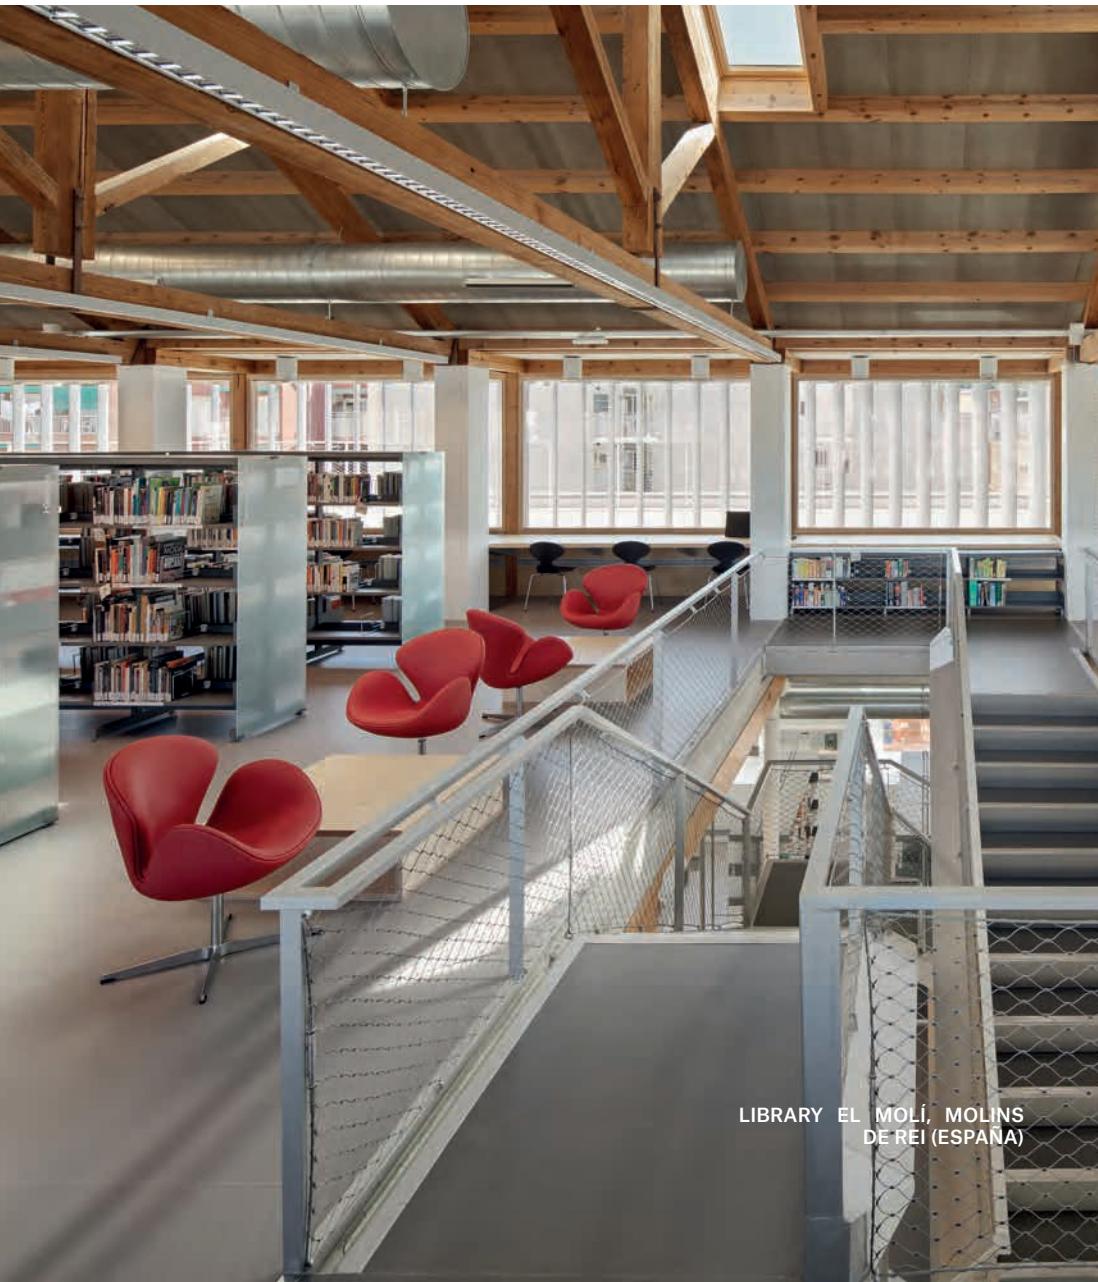

Research and ideation project to analyse challenges and offer new solutions that add value from lighting to this **new circular conception of architecture and building**, thanks to a collaborative ecosystem.

Light that brings your space to life

EDUCATION · OFFICE · COMMON SPACES · HEALTHCARE & WELLNESS · HIGH DENSITY TRANSIT · RETAIL · ARCHITECTURAL OUTDOOR

Education

Light that takes care and improve the educational experience.

Office

Light that promotes collaboration and creativity, as dynamic as the needs of the users.

Common spaces

Light that creates a welcoming environment without forgetting the technical aspects and good lighting control.

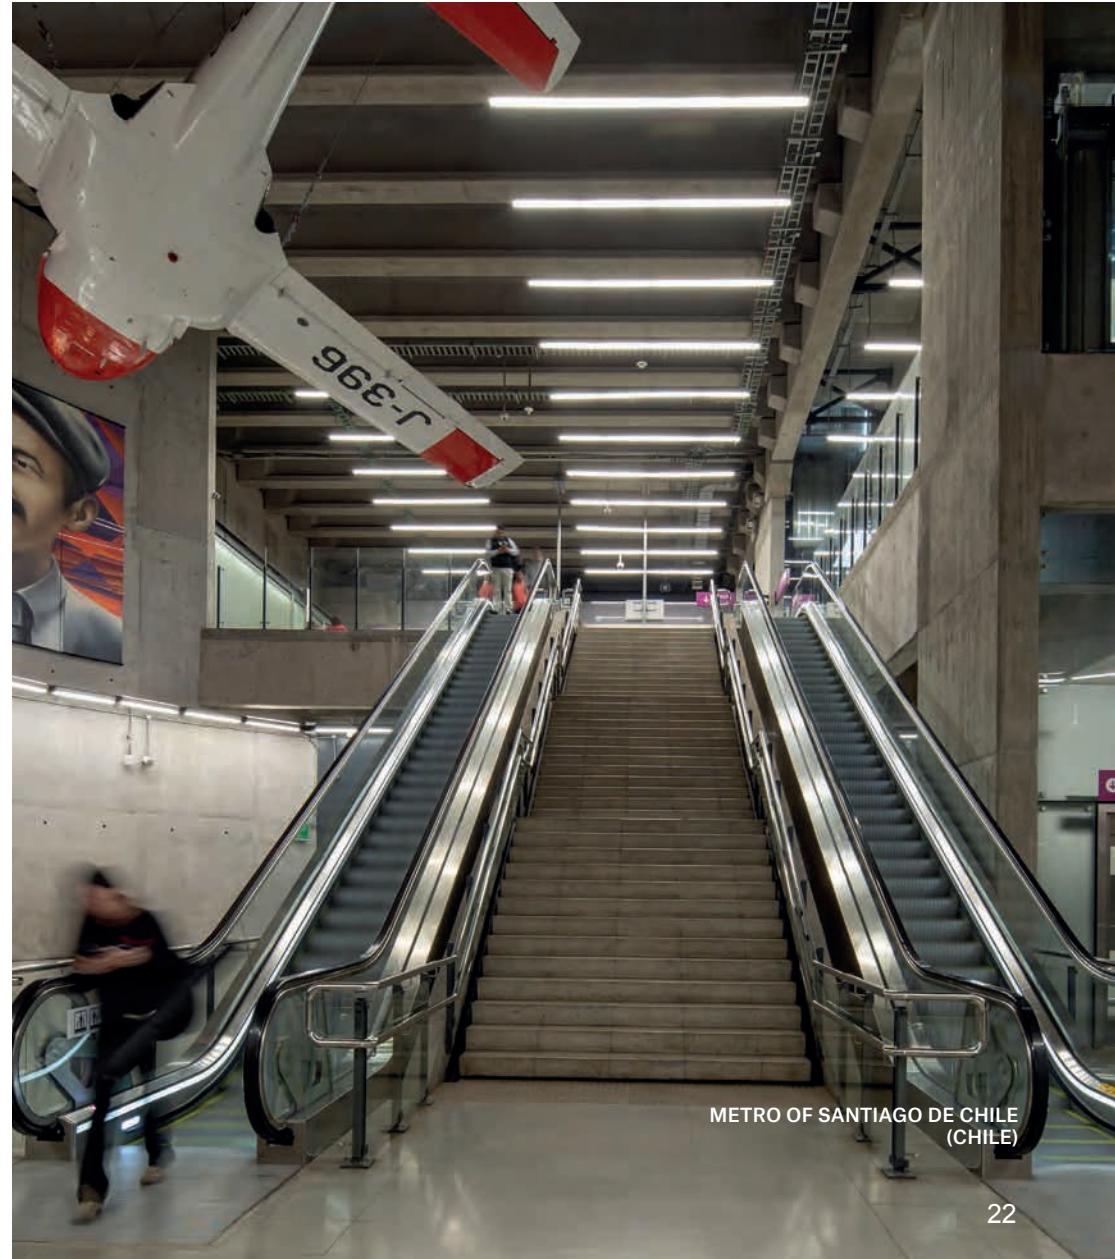

Healthcare & Wellness

Light focused on comfort and well-being, that improves the user experience.

High density transit

Efficient and durable light to meet the highest requirements for both: users and architectural space.

Retail Light for highlighting the essence of your products with the most suitable lighting features.

Architectural Outdoor

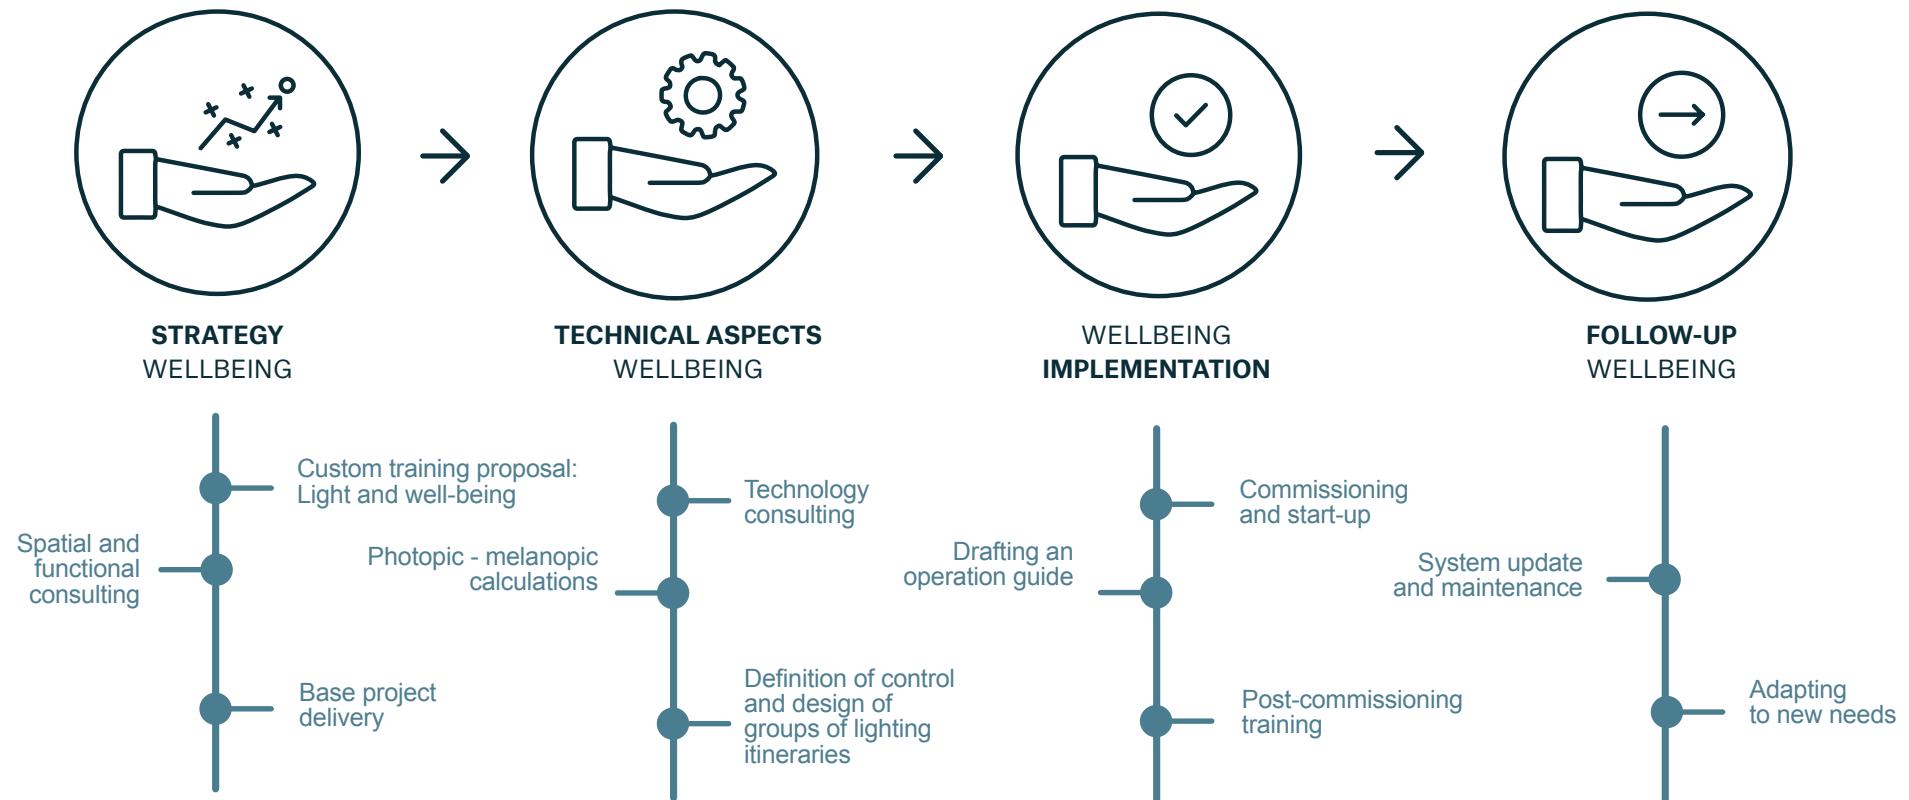

Light adapted to the human scale to create places with their own identity.

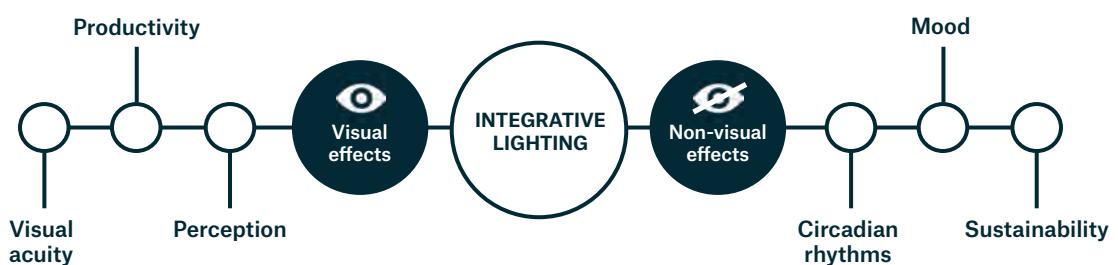

Services Lamp +

Integrative lighting service focusing
on the well-being of the end user. We
contribute people's well-being
through lighting.

The integrative lighting projects we offer with the Lamp+ service follow the **following phases:**

An integrative lighting project is designed according to biological human needs, **integrating the visual and non-visual effects of light**, taking into account not only light's visual impact, but also the emotional and biological effects that light has on people.

Services

Technological updating service, to promote the renewal and technological updating of installed luminaires. In this way we achieve an increase in the life of the luminaires, by extending their phase of use under the prism of Life Cycle Analysis, providing more resilient lighting solutions.

+ Affordable

Generating between 15-30% **economic savings** compared to the purchase and installation of new luminaires, as well as obtaining an **improvement in energy efficiency** that represents savings of more than 50%.

+ Convenient

Upgrading lighting technology is **faster, less noisy and cleaner** than uninstalling and installing new lighting. **Reducing installation time** by 20-30%. In addition to **improving lighting quality** by incorporating the latest technological advances.

+ Sustainable

Minimises the environmental footprint of the building by **avoiding the generation of waste** in the renovation process and extending the useful life of the luminaires. **Reduces CO2 emissions** both by reducing energy consumption and by reusing and updating the installed product.

EVALUATION, DIAGNOSTIC AND PROPOSAL FOR OPTIMAL SOLUTION

UPGRADE AND MAINTENANCE

INSTALLATION, START-UP AND CERTIFICATION

- 01** Audit and initial analysis of the current state of the installation.
- 02** Feasibility study and environmental impact assessment.
- 03** Recovery of installed luminaires.
- 04** Technical analysis to assess and identify the type of work to be carried out.
- 05** Maintenance and cleaning work.
- 06** Development and manufacture of Plug&Play modules (In-situ/ In-House).
- 07** Digitalisation and integration with control systems.
- 08** Quality tests, electrical and mechanical laboratory testing.
- 09** Extended warranty certification.
- 10** Delivery of material and management of waste generated "in house".
- 11** Turnkey service (installation and commissioning).

Case study

MERCAT DELS ENCANTS,
BARCELONA (ESPAÑA)

[VÍDEO CASE STUDY](#)

The work carried out in the Encants Market, promoted by Mercats de Barcelona, is an example of the transition towards circularity by promoting **the modernisation and creation of resilient infrastructures that extend their life cycle**.

48% energy saving	836 upgraded luminaires	-22 tн de CO₂ eq into the atmosphere	Better light quality provided
--	--	--	--

INACAP HEADQUARTERS, SANTIAGO DE CHILE (CHILE)

[VÍDEO CASE STUDY](#)

The headquarters of the INACAP (Professional Training Institute) in Santiago, Chile, have undergone a technological renovation to implement a **more sustainable lighting solution, improving energy efficiency and increasing the service life of the light fittings**, while also improving visual ergonomics.

55% energy saving	+20k upgraded luminaires	-318 tн de CO₂ eq into the atmosphere	More comfortable lighting
--	---	---	--

Light for circularity

VALUE CONTRIBUTION

CDW MANAGEMENT PHASE

- Waste recovery (EU Directive 2012/19/EU WEEE).

USE PHASE

- Technological update service.
- Soluciones lumínicas alineadas con estrategias de descarbonización:
Alta eficiencia - uso de materiales reciclados.

PRODUCTION MANUFACTURING PHASE °A1-A3"

- Reduction of the environmental footprint (embedded + operational emissions).
- Eco-design (3R).
- Waste reduction (use of recycled materials, packaging optimisation).

PLANNING AND DESIGN PHASE

- Environmental footprint information (EDP).
- Digitisation (BIM).
- Modular designs.
- Ease of installation (Plug & Play).
- Customised design (Co-Creation).
- Lighting and technological consultancy.

CONSTRUCTION PHASE

- O&Site Lighting Solutions.
- Customised logistics.

Life Cycle Assessment (LCA)

The life cycle analysis allows us to analyse and evaluate **the environmental performance of our products "from cradle to grave"**, quantifying the environmental impacts in each of the stages according to the **UNE-EN 15804:2012+A2:2** standard.

The environmental impacts analysed are among others: **global warming (GWP)**, **ozone layer depletion (ODP)**, **acidification (AP)** or **resource depletion (APD)**.

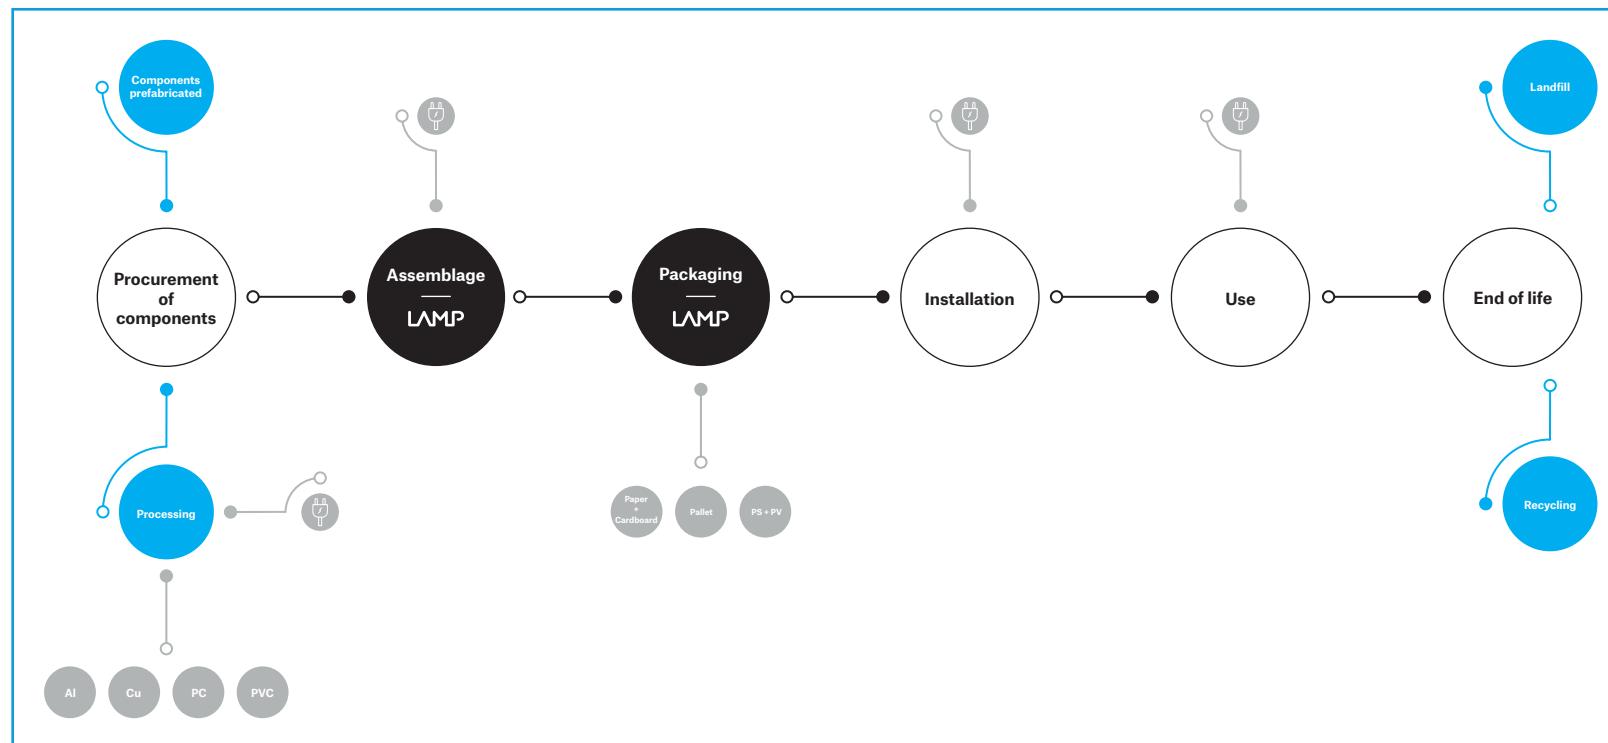

Environmental Product Information (EPD)

We currently have **Environmental Product Declarations** for more than **50%** of the references that make up our catalogue.

(Environmental Product Declaration)

ISO 14025 & EN 15804

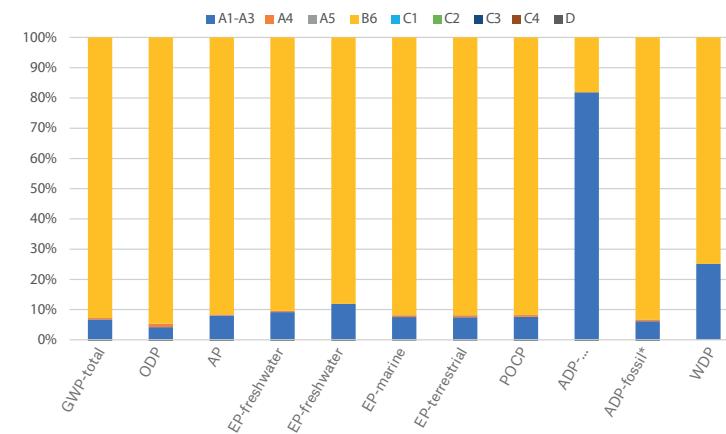

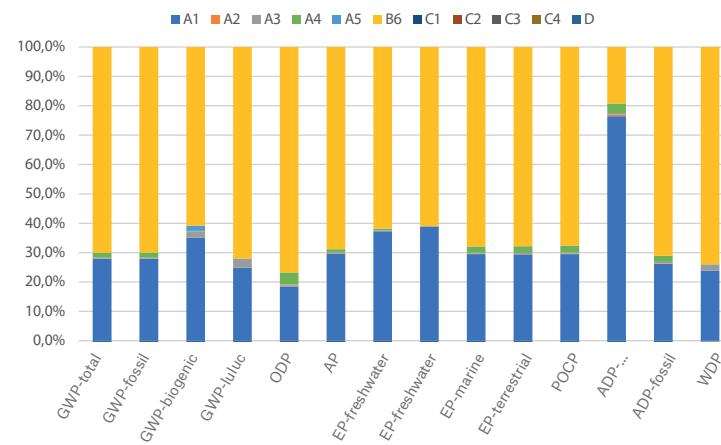

We contribute with **the necessary actions and information to favour the transition towards a circular economy**, and to achieve the objectives established to curb the climate crisis, showing our impact, both in absolute data (Kg CO₂ eq), and the percentage ratio of the impact in each phase.

Wellbeing Technology

Reconnection with nature

Wellbeing technology focuses on the **well-being of people**, since it allows **respecting the natural biorhythms of the human being**, reducing the most aggressive emissions for vision and maximizing the most effective ones for circadian activation.

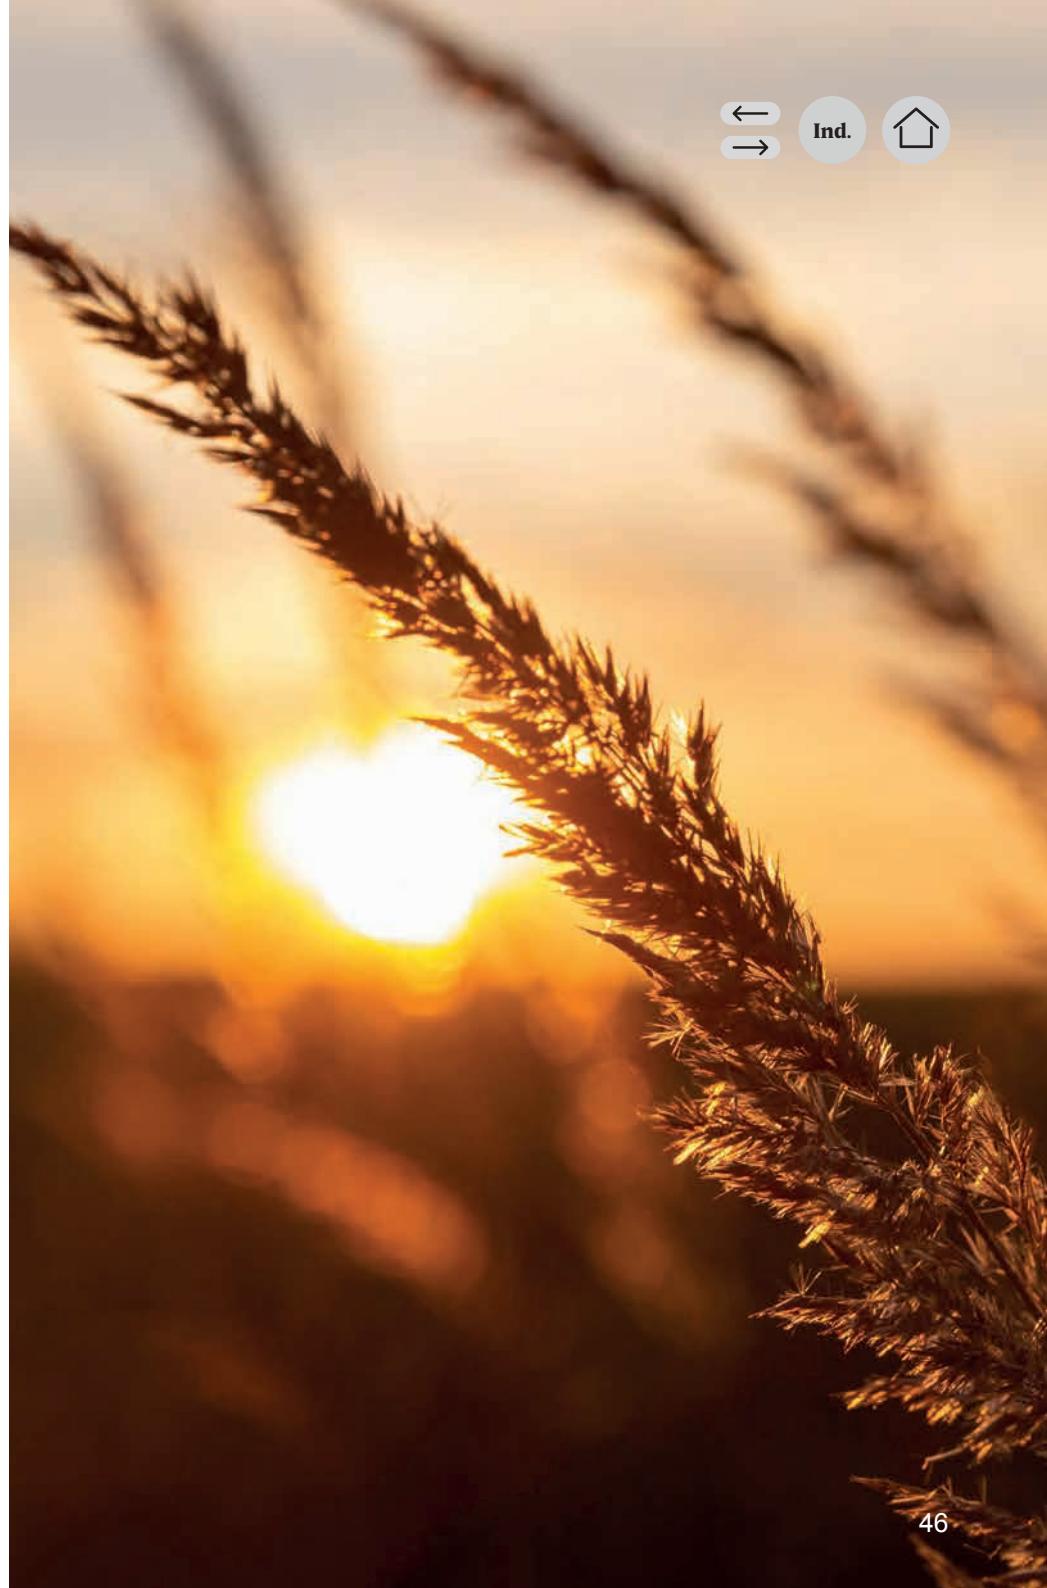

Reproduces all visible wavelengths of light accurately imitating **natural sunlight**.

At Lamp we are constantly updating to expand the use of this technology in our products to provide optimal **circadian stimulation**, especially needed during the early hours of the day and regularly considering check color quality metrics, such as CRI and TM- 30, as well as the spectral power distributions (SPDs).

Light Spectrum
LED Wellbeing

LED Wellbeing technology adapts its spectral distribution to provide a continuous curve more similar to daylight.

Wellbeing Technology

What benefits does Wellbeing technology provide?

Positive impact on human wellbeing

Thanks to its spectral distribution, and its optimization of emissions corresponding to 480 nm, it offers high circadian activation, helping to regulate sleep cycles and wakefulness, improves energy levels and promote a general feeling of well-being.

Improves visual perception

Provides better quality and visual definition, reducing eye fatigue and improving visual comfort.

Excellent chromatics reproduction

CRI95 in downlights / CRI98 in linear systems.

Accessibility and applicability

We apply technology in a wide range of products for different environments and spaces, improving the quality of light and user experience.

Low VOC emissions without formaldehyde.

Visual health

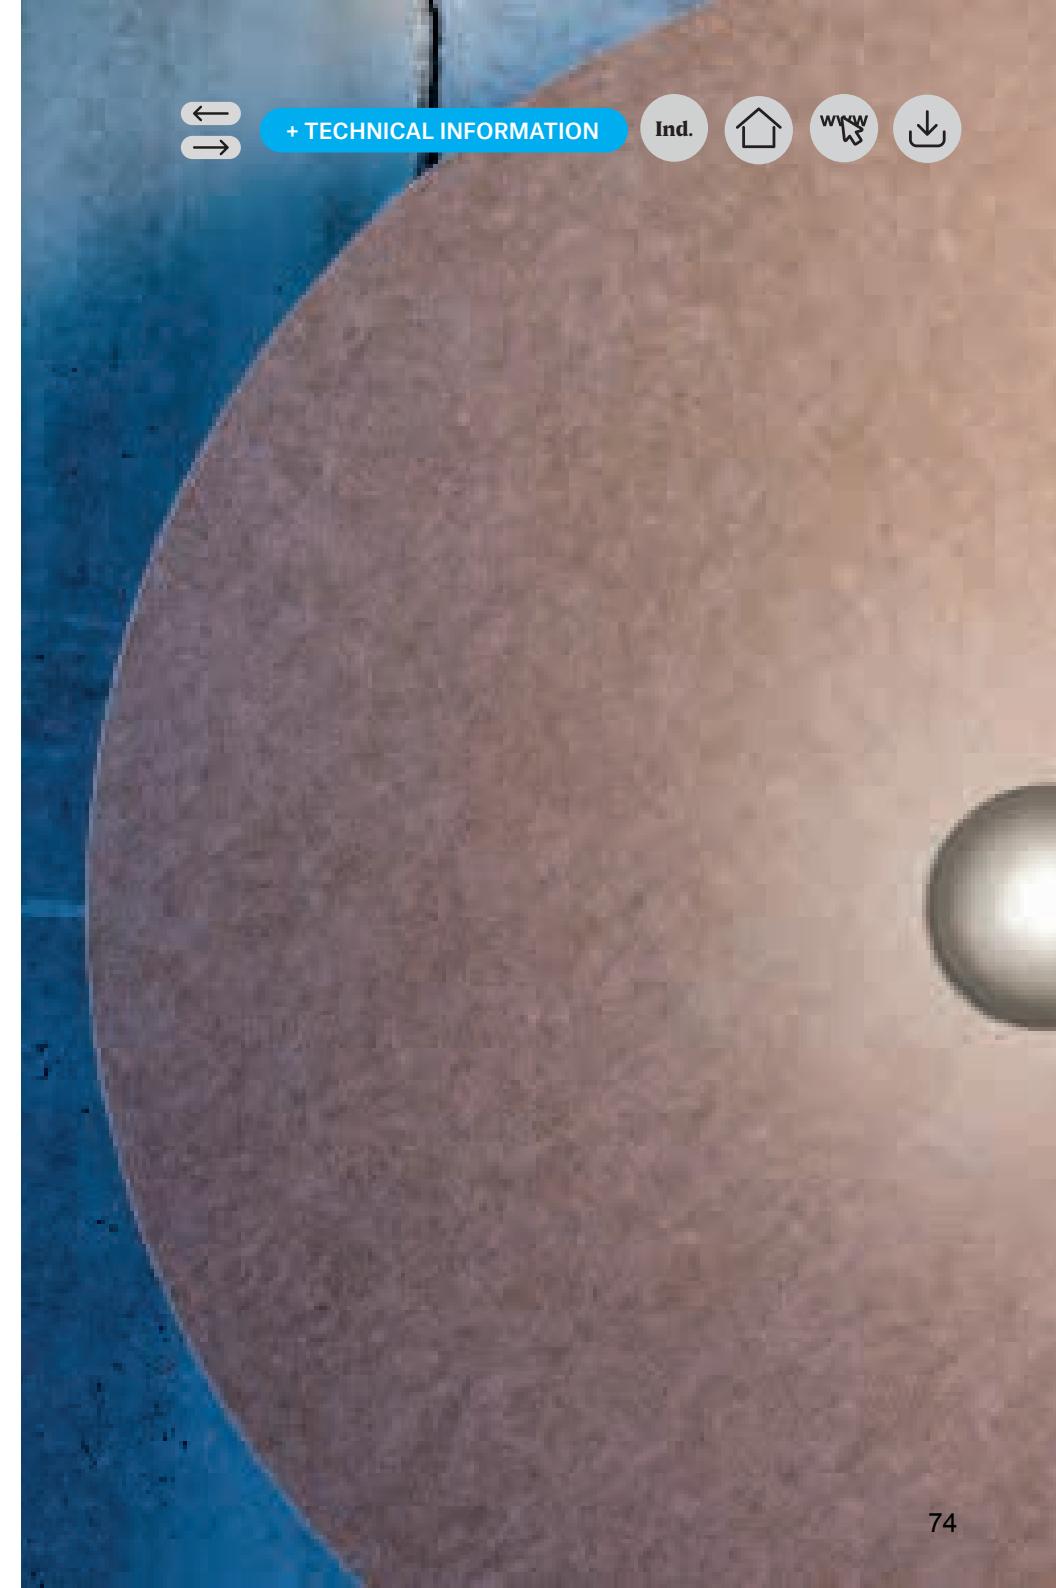

Integrated lighting solutions meet high visual comfort requirements:

Active glare control: **opal and opal comfort diffuser.**

RG0 "risk exempt" luminaires according to the Photobiological Safety standard UNE 62471.

High visual comfort models with large shielding angle, black reflectors and Ultra comfort optics.

Flicker free.

+ TECHNICAL INFORMATION

Adaptability and customisation

In addition to the great technical versatility of these luminaires, there is a range of 56 colours, custom finishes (die-cutting, bevelling, printing) and made-to-measure developments available.

Consultancy services

To perfectly integrate the lighting and acoustic project.

Ecodesign criteria

Designed within a circular economy concept that facilitates the recovery and reuse of luminaires. It is made of a sound-absorbing recycled PET felt non-woven fabric (from bottles). Some of the luminaires are made of recycled materials such as Aluminium or plastics.

HANCE BIOPHILIA

Design by Lamp

Biophilic design

~ *Biophilia: psychological trend to be attracted to everything living and vital* ~

Biophilic design seeks to foster the innate connection between humans and nature within the project, helping to create healthier and more comfortable spaces by integrating organic components and natural materials. Practice included in some specialised standards in the generation of healthy spaces

Benefits of vertical gardens

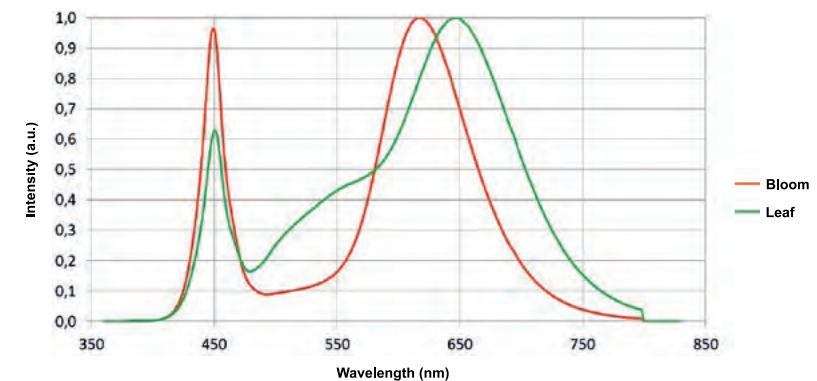

- **Air purification.** Removing up to 85% of toxic agents from the air, such as benzene, formaldehyde and trichloroethylene.
- **Thermal Insulation.** Reducing temperatures in hot weather and maintaining the interior case in cold weather.
- **Acoustic Isolation.** Absorbs up to 10 dB of ambient noise.
- **Improves users' sense of well-being and comfort.** Contributes to creating greener urban landscapes, having a positive impact on biodiversity, climate change and mitigating the heat island effect of cities.

Optimised light spectrum for vegetation lighting.

- "Full Spectrum"
- CRI up to 85
- CCT (approximate) 2700K
- Lighting option for 'Plant Growth' or 'Generative Growth (Flowering)'.
- Flux: Up to 177 µmol/s
- Efficiency: 2.7 µmol/J
- Luminous distribution: FL (37°), MFL(24°), Elliptical

*Light source data

Hance Downlight

"Endless possibilities"

High performance, sophisticated style and versatility in a recessed lighting solution that exceeds your expectations. Design based on flexibility within retail spaces, a new family of accent lighting is born, characterised by its wide range and application.

Design by Lamp

High flow recessed solutions

Downlights designed in a variety of sizes and fluxes bright, from 975 lm to 4,100 real lm.

- Integrated model**

With a rotation of 355° and inclination from 0° to 30°, for applications where the product goes unnoticed and is seeks maximum integration in space.

- Semi-recessed model**

With a rotation of 355° and inclination from 0° to 85°, for applications with higher requirements light direction. Fix lighting shelves where uniformity is required throughout the vertical plane.

High efficiency and variety of lighting options

- Maximum energy efficiency, up to 165lm/W.
- Available in different color temperatures, (3000-4000K) and high color rendering (CRI90), offers great variety of opening angles to adapt to the needs of lighting: super spot (10°), spot (20°), medium flood (25°) and flood (35°).

Variety of finishes and additional accessories

Interchangeable and customizable rings that allow you to incorporate various optical accessories in an integrated way and adapt to the lighting requirements with coherence and meaning in space.

Finishes: The body available in two standard finishes: black and white, incorporating an anti-glare ring black, also available in metallic copper, silver and white.

Wide range of lighting accessories: elliptical lenses, lenses soft, anti-glare honeycomb grilles and trimmers

Hance Spotlight

"Endless possibilities"

Designed with flexibility in mind, Hance Spotlight is the perfect choice for retail and exhibition lighting. With an enhanced efficiency of 127lm/W, this family of accent lighting stands out for its versatility and applicability in a variety of environments. We are committed to technological innovation and look forward to an infinite horizon of possibilities.

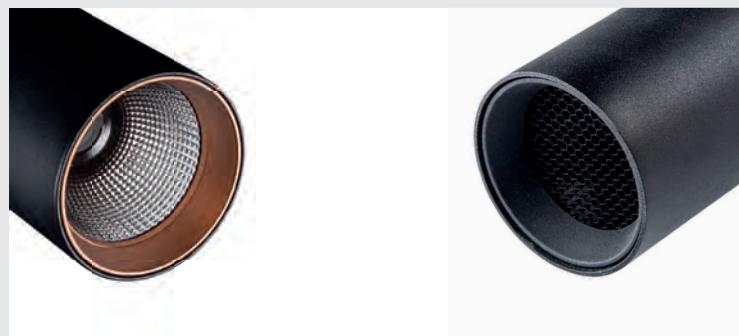

Design by Lamp

Responsive Designed

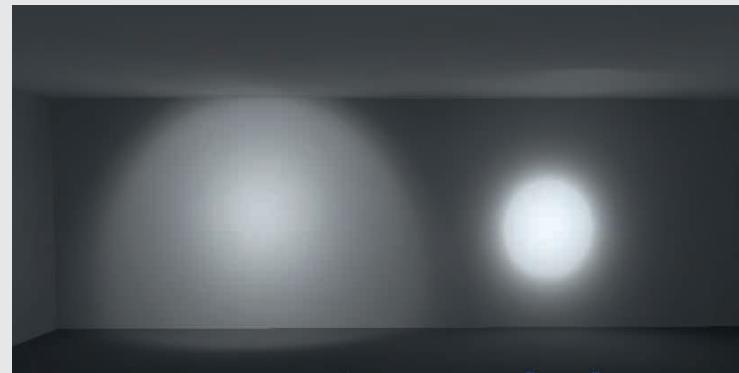

Our spotlight projectors are available in three installation options: **track, surface or semi-recessed, (355° rotation and inclination from 0° to 90°)** providing versatility in your installation. Furthermore, the family is complemented with their downlight versions.

Variety of finishes and accessories

Finishes: The body is available in two standard finishes elegant: textured black and white, incorporating an anti-glare ring black, also available in metallic copper, silver and white.

Wide range of lighting accessories: elliptical lenses, lenses soft, honeycomb anti-glare grilles and trimmers.

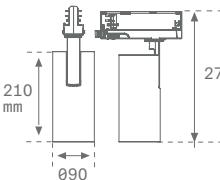

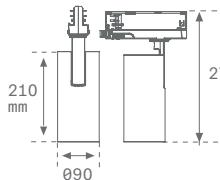

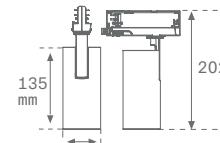

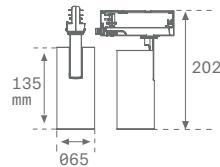

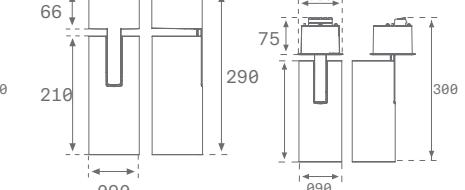

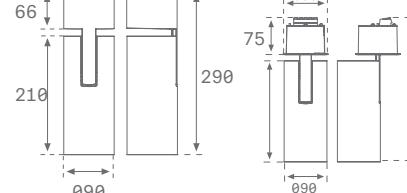

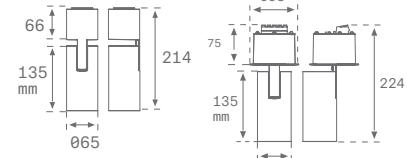

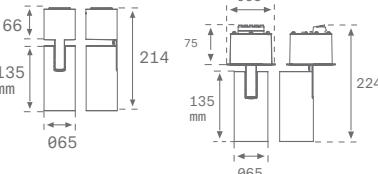

High efficiency and variety of lighting options

- Maximum energy efficiency, up to 108lm/W.
- Available in different color temperatures, (3000-4000K) and high color rendering (CRI80-90), offers wide variety of opening angles to adapt to the lighting needs: super spot (10°), spot (20°), medium flood (25°) and flood (35°).

Integration with space

Models with 48V rail installation that seek maximum integration in space with a miniaturized design and little intrusive with the environment.

Ocult Downlight

"Versatile lighting with the highest comfort"

A modular downlight concept has been created with visual comfort as its design starting point, offering excellent lighting versatility under minimal formal expression, with the possibility to choose between accent or general lighting, as well as a wide variety of lengths, modular layouts and finishes.

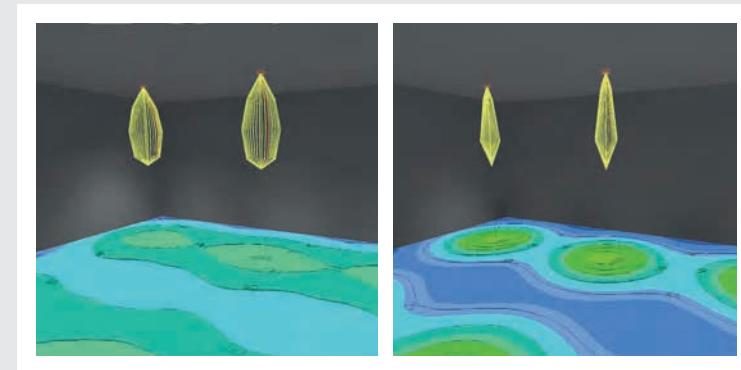

Design by Lamp

High visual comfort

The optical design is carried out by means of a lens and a 33° cut off, making it possible to offer a high visual comfort with a <19 or <15 UGR (for 4H, 8H 70/50/20) depending on the optics.

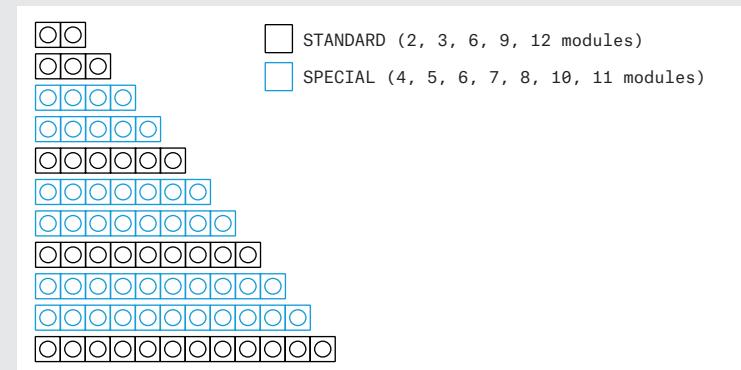

Versatility in lighting applications

Thanks to its wide range of fl ws and openings: MFL (24°) and WFL (48°) it can be used both for general lighting spaces with a uniform light, and for hospitality spaces where contrasts of light are required.

Link with interior design

The interchangeable front trim system makes it possible to link light aesthetics with context, and offers trimless solutions for less impact on space.

Customisable length

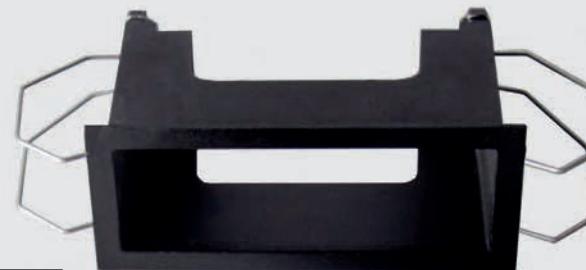

Its technical concept enables for the customisation of its length to better adapt to the specific n eds of each project.

Finishes

Three versions incorporated in single solution to solve multiple applications:

Basic: Opal model, for general lighting.

Comfort: Model with optics, UGR <16 and efficiency up to 107.60lm output/W.

Efficiency: Model with reflector, different apertures. UGR <19, and efficiencies up to 130 lm output/W.

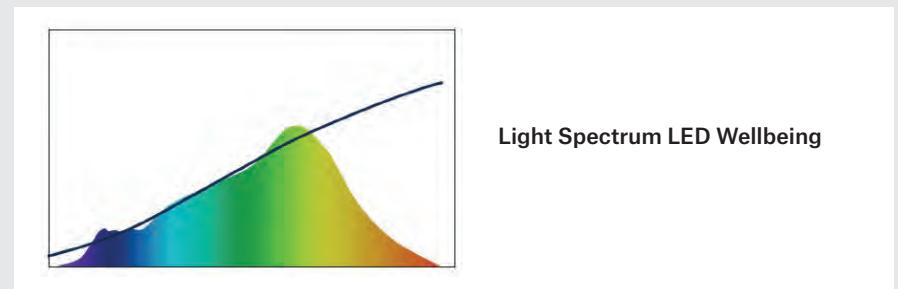

Reflector made of recycled polycarbonate R-PC WHITE™ with bromine-free flame retardant. Flammability grade V0 according to UL94.

Environmental declarations based on the UNE 15804 standard, which quantifies the **impact on the carbon footprint** throughout its life cycle.

Versatility of applications: possibility of recessed, surface, suspended and nomadic system version (adaptation to electrified rail) installation.

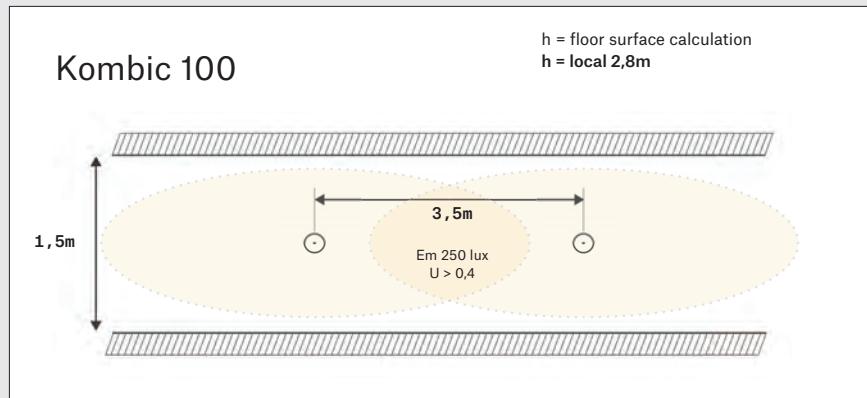

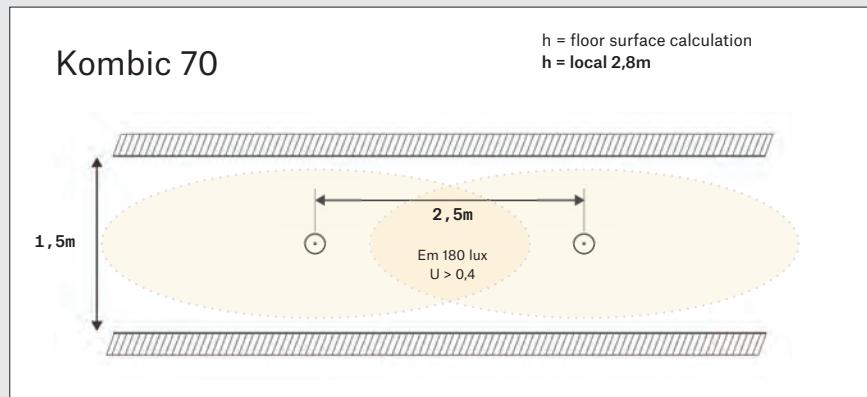

A wide variety of technologies available in the same family, incorporating models with **Wellbeing technology**.

New Elliptic and WallWasher optics for the family:

Elliptic optics optimizes light distribution. This luminaire allows to increase the distance between luminaires, reducing the effect of residual light on the walls. Ideal for illuminating passageways, longitudinal areas such as counters and spaces adjacent to work areas.

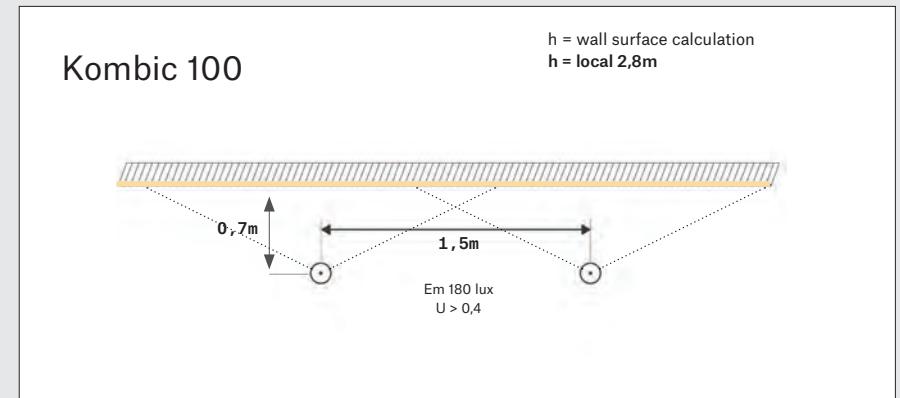

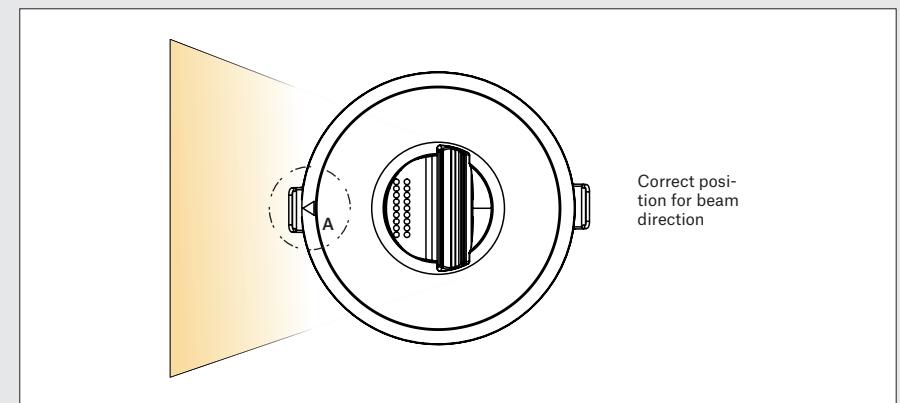

Available for Kombic 70, 100 and 150.

Examples recommended installation scheme in **pass-trough areas**

Wallwisher optics for control of light distribution to the vertical surface without dark areas.

Available for Kombic 70, 100 and 150.

Examples recommended installation scheme in **pass-trough areas**

Moody

"Just play"

A tool created for play. A family in which the "Do it yourself" concept is valued above all else. Experiment with light and play with the product, changing its parts and discovering the different roles that the luminaire can play in the same space.

Design by Lamp

Environment integration

Unobtrusive with the surroundings, thanks to its small ring. It allows the integration of a trimless model but at the same time with an easy installation.

Light engine design and thermal dissipation

Design of the light engine inspired by a photographic lens. Far from being hidden, the mechanisms are shown to enhance the beauty of thermal design.

Lamp Worktitude for light

Wide range of products

Configurable system with 360 possible combinations (without optical accessories).

Easy to install

No tools needed in the installation process. Joint between Core and Reflector by pressure that could be easily disassembled. Springs used in the ceiling fixing system allow easy assembling and disassembling. The Cylinder Saw used in the recessing hole is essential.

Stormbell 80

'Making the office feel like home'

In keeping with the rationalist style of its predecessor, Stormbell 80 maintains the technical requirements for high-quality lighting, lighting comfort, and glare control while adopting a friendly language for new and constantly evolving spaces. Miniaturisation and the 4 lampshade models in different shapes, sizes and materials, provide this solution with the ability to create a variety of lighting moods and a sense of proximity.

Design by Artec Studio

Technical proposal in a friendly language:

A new lighting solution for constantly evolving workspaces, featuring high-quality technical lighting based on a miniaturised light engine with a high level of lighting comfort in a wide technological variety. It is possible to choose between standard technologies in different CCT (2700 -4000K) and standard or Wellbeing technology for circadian optimisation and promotion of users' well-being.

Flexible lighting:

Multiple installation possibilities: suspended with recessed or surface-mounted rose or rail installation for Nomadic System integration.

Ecodesign criteria:

Designed within a circular economy concept that facilitates the recovery and reuse of luminaires. Use of recycled materials such as recycled PET felt (from bottles) or recycled cork (from cork stoppers).

Stormbell

"A timeless bell fixture design"

A timeless design clearly inspired by rationalism. An interaction between the different types of lighting and accessories allows you to create different environments. It is perfect for use in retail and hospitality spaces.

Design by Artec Studio

+ TECHNICAL INFORMATION

Ind.

Pure geometry and timeless design

Its design is the result of pure geometris combination.
Inspired by Bauhaus school timeless design (design reference).

The shape expresses function

Its shapes talk about thermal dissipation needed for
the correct thermal LED management.

Deco Stormbell

Model with diffused light effect at the junction of the Core with the reflector. The reflectors / diffusers are made of special polycarbonate for LED, in three types of finishes: white, black and opal.

Configurable system

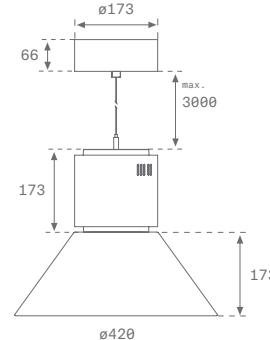

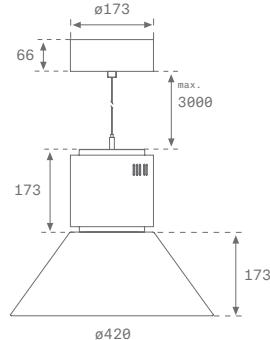

Configurable system that can fit each space with the best combination. With 144 possible combinations.

Mun

"Light to watch and light to contemplate"

Light is often thought of as a tool that serves technical and functional purposes, but light can also be used as a tool to create environments. Light with which to see and light to admire. Why not deliver these two visions in one family?

Design by Lamp

Wide family range

Mun Light has a design that allows a luminaire with a minimum height of 43mm, providing a uniform light surface in all available diameters so that they can be combined with each other: 350mm, 450mm and 600mm. Surface mounted and suspended installation is available with accessories.

Mun Dark is a versatile indirect lighting product that allows you to create different compositions in space, providing ambient lighting. Available in 120mm, 180mm and 300mm diameters for surface, wall or composite installation.

Comfort and well-being

Free of photobiological risk UNE 62471.

Flicker-free: Compliance with IEEE 1789 -2015 LED methods and according to NEMA 77-2017 (.Pst LM<1.0 and SVM <0.6).

Two luminous flux possibilities: LO (Low output) and MO (Medium Output).

Prismatic diffuser or active glare control: UGR<19 (LO and MO).

Colour temperature: 3000K 4000K.

Excellent colour rendering CRI90.

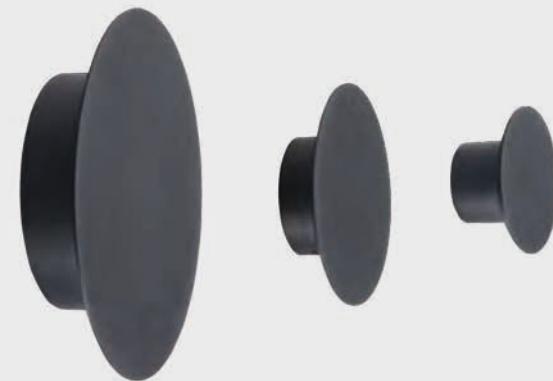

Equivalent luminance in luminous surface area in all models so that they can be combined with each other.

Ecodesign criteria

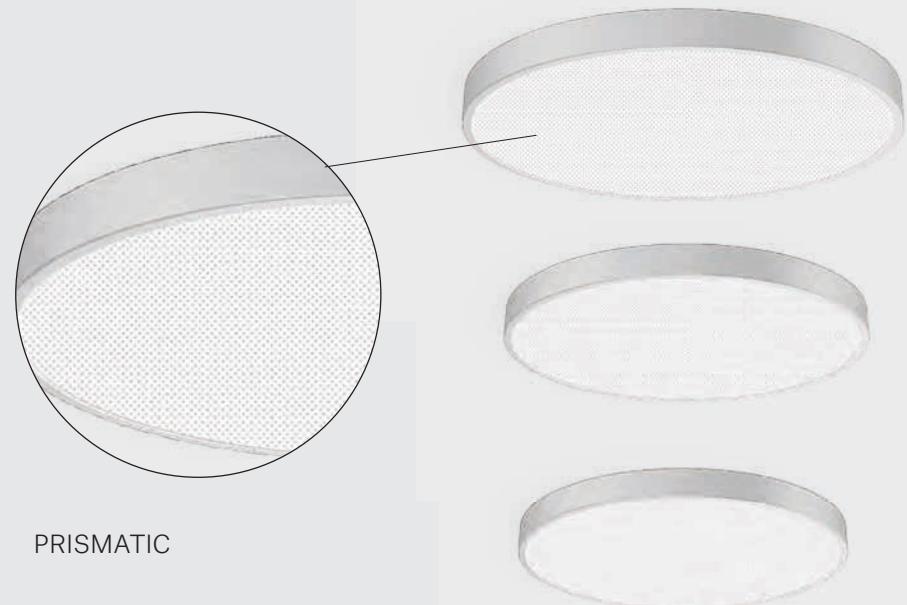

Material: recycled aluminium extrusion body.

Efficiency: up to 141lm/W.

Ambient G2

"The technique of ambient light to shape the space"

Linear wall-mounted lighting solution that meets high technical requirements, maximising the volumetric expression of the space.

Design by Lamp

Visual comfort and well-being

Photobiological Risk Free: Group 0" according to standard recommended in UNE 62471.

Flicker-Free: Compliance with IEEE standard 1789 -2015 LED methods and according to NEMA 77-2017 (.Pst LM<1.0 and SVM <0.6).

Direct and Indirect distributions: Improving visual balance and vertical illuminance.

Multiple light distributions adapted to users' needs (Opal, Asymmetric, Grazer).

CCT 3000K and 4000K, Dynamic LED Technology with colour temperature adaptation (2700-6500K).

Ecodesign criteria

Materials: Reduction of the CO₂ footprint in manufacturing thanks to the use of recycled aluminum.

Recycled aluminum: Made of extruded aluminum recycled at a rate of 80% with ASI seal.

Efficiency: up to 142 lm Out/W.

Circularity: Designed under the ecodesign criteria:

Reduce: more compact, less materials.

Reuse: incorporating materials of recycled and recyclable origin.

Repair: We extend the life of the product thanks to a modular product, extending its use phase (B6).

Recycle: Disassembled product to assess its recovery at the end of its life cycle.

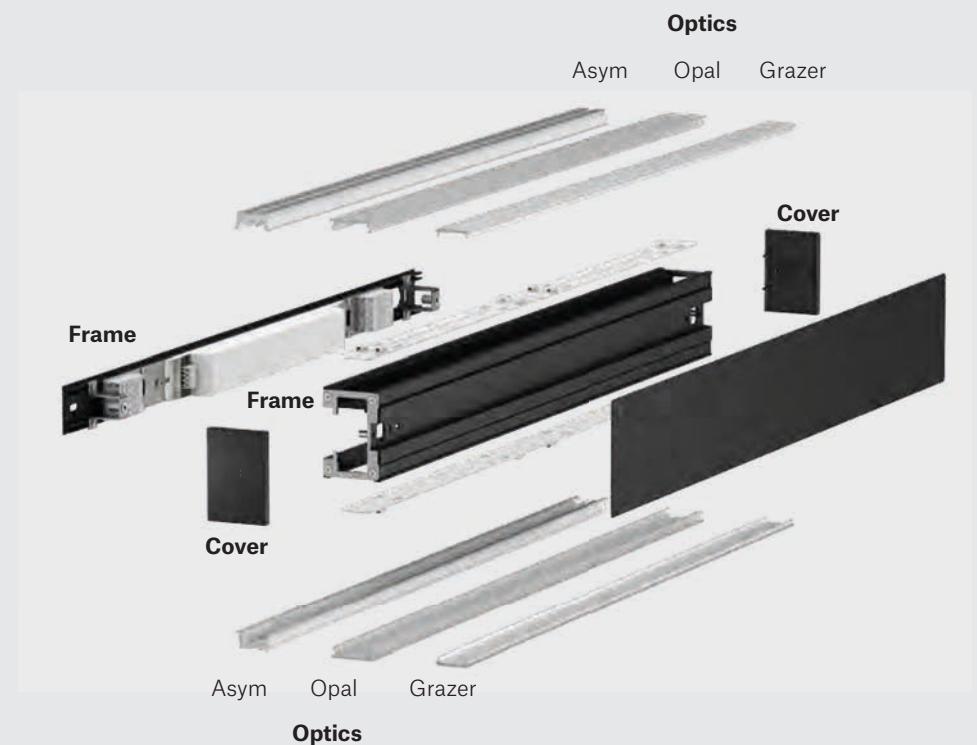

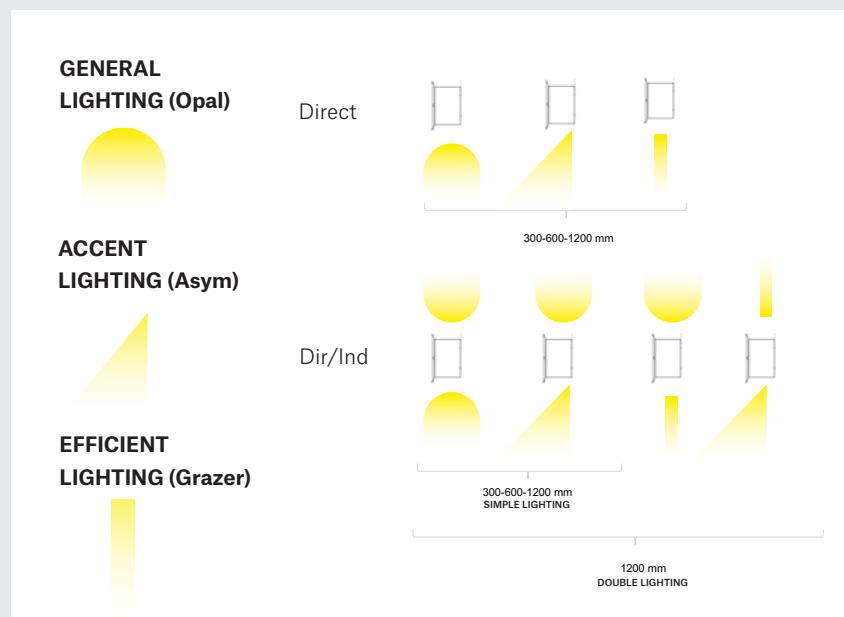

Three optical versions can be combined with each other

GENERAL LIGHTING: Opal distribution for general comfortable ambient light, increasing visual comfort and contributing to the contribution of cylindrical lighting.

EFFICIENT LIGHTING: Asymmetric optic to maximise the lighting effect on horizontal planes (ceilings and floors), illuminated from the perimeter.

ACCENT LIGHTING: Grazer optic to emphasise vertical surfaces and highlight textures.

Application and functionality

Individual and Continuous Line Installation: Pre-installed wall-mounted frame to absorb surface irregularities and facilitate the installation of continuous lines.

Application: Individual and double ignition, for precise control depending on the lighting application.

Luminaire fini hes:

- WHITE / BLACK.
- FOUNDATION and RETROPIA palettes.

Front accessory fini hes:

- WHITE / BLACK.
- ANODISED: gold, bronze, champagne, blue and black*.
- RAW: the most honest materiality*.

*Finishes only available for front accessory. Luminaire black or white.

FIL SYSTEM

Design by Lamp

Visual comfort

Integrated lighting solutions meet high requirements:

Active glare control: **opal confort**.

RG0 'risk exempt' luminaires
according to the Photobiological Safety standard UNE 62471.

High visual comfort models with **large shielding angle, black reflectors and ultra confort optics**.

Flicker free.

Sustainability

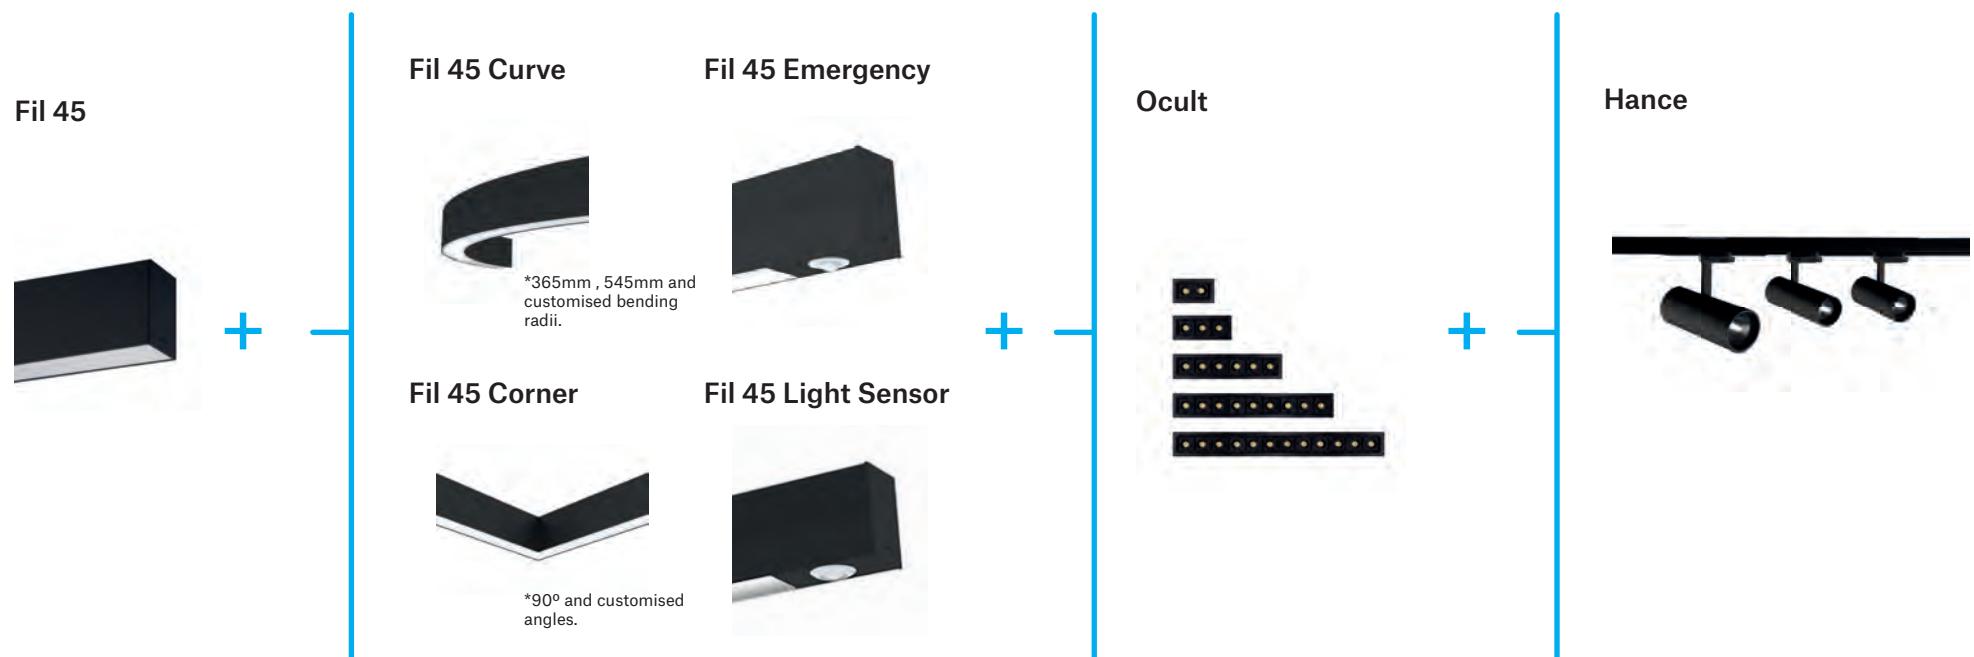

Designed within a circular economy concept that facilitates the recovery and reuse of luminaires.

Made of recycled extruded aluminium.

Configurator Fil 45

It is a **configurable and combinable system that adapts** to the needs of any project.

Fil 45 Emergency

Emergency kits Fil 45 offer a fully integrated solution in the luminaires to provide safety, regulatory compliance, ease of installation and maintenance.

It is a reliable solution that guarantees the safety of users.

Fil 45 Emergency

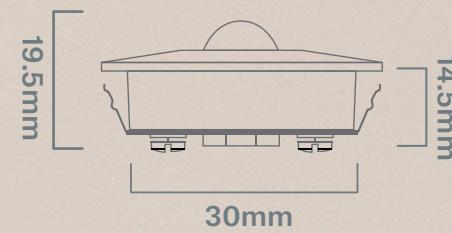

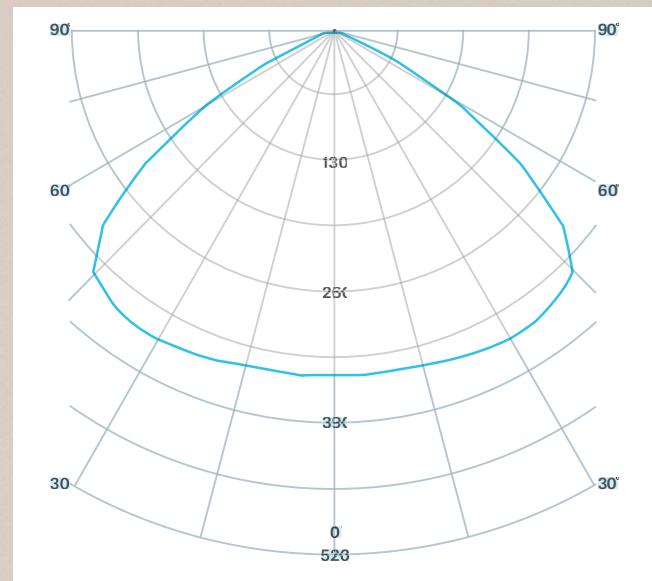

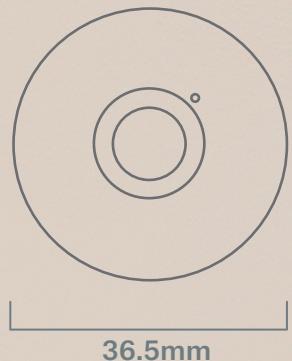

INTEGRATED EMERGENCY SYSTEM

All integrated in a **single lighting solution**. It guarantees the availability of emergency lighting in case of power outages, which **increases the safety of users and allows a safe evacuation in emergency situations**.

Integrated status indicator for operation confirmation. Standard technology.

VERSATILITY AND FLEXIBILITY

Availability of 3h autonomy that ensures uninterrupted operation during emergency situations, depending on needs.

Fil 45 Light Sensor

The luminosity and presence sensor complement for the Lamp Fil 45 luminaire offers advantages in terms of **energy saving, visual comfort, convenience and regulatory compliance.**

Fil 45 Light Sensor

ENERGY SAVING

The luminosity and presence sensor complement allows the Fil 45 luminaire to automatically **adjust its lighting level based on the amount of natural light available in the environment**. This ensures efficient use of energy by avoiding unnecessary switching on of lights when there is sufficient natural light.

VISUAL COMFORT

By adapting to ambient light conditions, the Fil 45 luminaire **provides a comfortable, glare-free environment**, which contributes to the visual well-being of users.

EFFICIENT INTERACTION

Allows automatic switching on of the luminaire when presence is detected in the room. As well as automatic shutdown when there is no presence, it also allows the **custom configuration** of a gradual shutdown, allowing the flow to be reduced for a few minutes, before proceeding to complete shutdown, according to specification.

Fil 45 Curve

Fil 45 Curve complements the Fil 45 family by offering two radii of curvature for **greater versatility in the space lighting.**

Fil 45 Curve

RADIUS OF CURVATURE

365mm

545mm

INSTALLATION FLEXIBILITY

Available in surface profile and with suspension option, facilitating its integration into different configurations and lighting designs.

COMPATIBILITY AND VERSATILITY

Combinable with other products from the Fil 45 such as straight lines, 90° corners and even personalized angles. This allows for creative optimization in lighting projects and greater **flexibility in the design**.

PERSONALIZATION

Possibility of **manufacturing custom radii of curvature** to meet specific lighting requirements. Our team is trained to **design custom lighting shapes, sizes and technologies**.

Min. custom radius: 365mm

Max. custom radius: on request

Fil 35

*"Reinventing a classic concept:
Lighting expression"*

The miniaturisation of this product family retains linearity while performing as a lighting solution to highly demanding spaces in terms of formality requirements, blending in fully with its surroundings. Fil 35 is the structure that fits the maximum technology within the minimum volume.

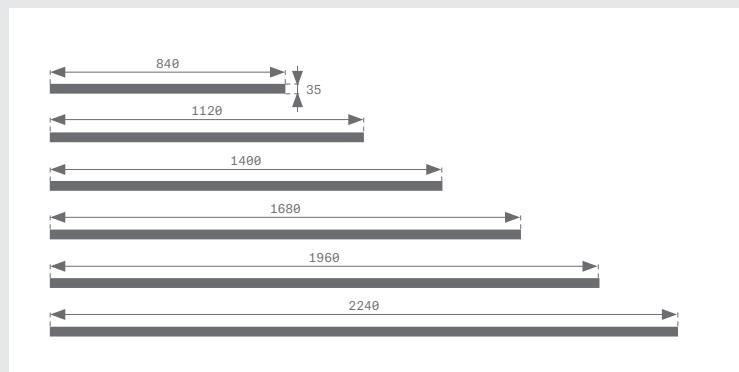

Design by Lamp

Miniaturisation

The miniaturisation of this family gives a lighting solution for highly demanding spaces in terms of formality requirements, by respecting and enabling a perfect integration in its environment. Fil 35 is the structure that conforms to the maximum technology within the minimum volume.

Great variety of lengths

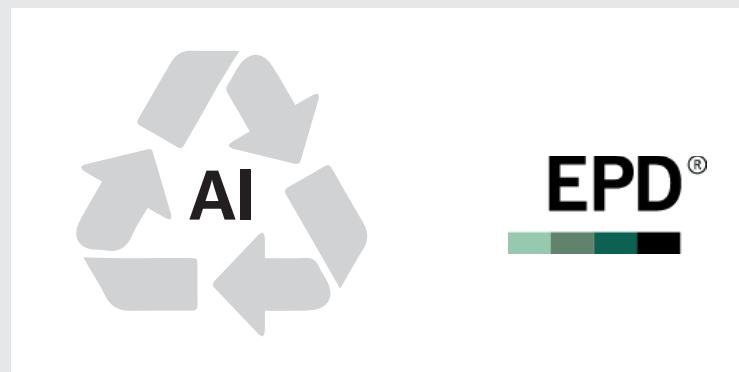

This is a linear luminaires family with a wide range of lengths, available in six standardised dimensions and with the possibility of customising special lengths. The miniaturisation of the profile dimensions enables a high integration of the product in the space.

Lamp Worktitude for light

Horizontal and vertical elbows for 3D configurations

It can be installed surface, recessed, and recessed without trim, in black, white, or matte grey finishes. 90° corners are also designed to be installed in both horizontal and vertical directions, enabling 3D configurations to be made.

#Worktitude For Life

Product made of recycled aluminium extrusion at a rate of 80-85%, reducing the carbon footprint of products and processes, as well as the environmental impact across the entire value chain.

Fil 45

*"A classic's functional evolution:
The calling to give answers"*

Retaining the family's timelessness, Fil expands reducing its dimensions and increasing its possibilities. Fil 45's calling is to provide quality general lighting, capable of adapting to any space. While responding to the high lighting requirements that a project may require.

Design by Lamp

Variety of light distributions

Possibility to choose between Opal, Opal Comfort and Tech diffuser Ultracomfort according to the lighting requirements of each application. **The Tech Ultracomfort** option also offers two light distributions, using a black reflector of polycarbonate with a symmetrical (TE) or asymmetrical (TA) optic.

Visual comfort.

Two solutions with optimized light distributions for provide visual comfort:

- **Opal Comfort**, maintaining a uniform opaline aesthetic, incorporates a technical sheet, providing greater control luminous (UGR<16).
- **Tech UltraComfort**, combined optics to offer an active glare control (UGR<15).

Dark light effect: satisfies the requirements of the limit of darkness that classifies it as Dark Light: it is less than 200cd/lm 2 above a viewing angle of 60°.

High real luminous efficiency (105lm/W).

Integrated functional and ambient lighting

Direct and indirect lighting integrated in the same luminaire: double lighting effect for suspension installation. Design designed for spaces in which you want to highlight the ceilings or achieve less visual fatigue, such as in work spaces and offices, **avoiding high contrasts and glare**.

#WorktitudeForLife, environmental impact assessment.

Manufactured from recycled extrusion aluminum at a rate of 80-85%, thus reducing the carbon footprint and environmental impact. The Fil family has been designed with ACV in mind (Life Cycle Analysis), and has EPD.

Fil 70

"Versatility expressed as structure"

When a luminaire can adapt to any space, it has one of the most valuable characteristics a product can have: versatility. With a minimalist design, Fil 70 covers a broad range of applications with indirect and direct lighting options, low-glare models, asymmetrical distribution, and distinct installation choices.

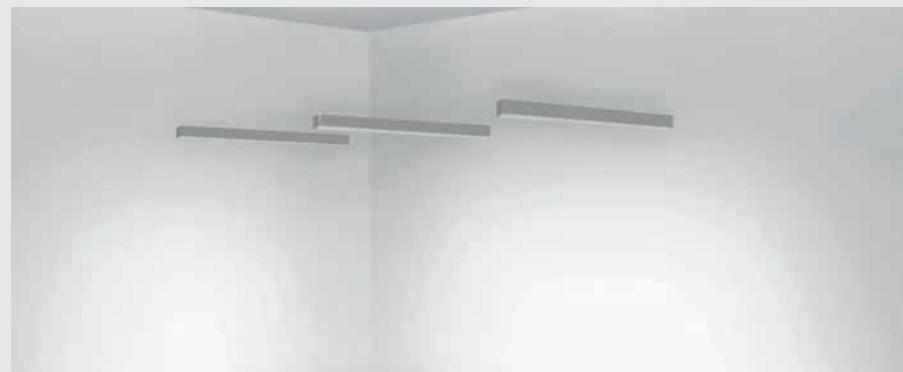

Design by Lamp

Lighting control

The Fil 70 range has a wide range of optical solutions, such as the tech and asymmetric light distributions.

Functional and environmental lighting

Direct and indirect lighting integrated into the same luminaire, achieving a double lighting effect for the installation of suspended Fil. Designed for spaces aiming to highlight ceilings or reduce visual fatigue, such as work spaces and offices, avoiding high contrast and glare.

Modular geometric configurability

Linear system to set up the continuous lines through joints, and also special geometries through 90° L-shaped corners.

Photobiological Risk

Our Fil family is classified in the 'Group 0' of photobiological risk, and is therefore completely risk-free. The application of this type of product is extremely important in certain applications, in which users are exposed to artificial lighting for long periods, or spaces where the main users are highly sensitive to light.

#Worktitude For Life

Product made of recycled aluminium extrusion at a rate of 80-85%, reducing the carbon footprint of products and processes, as well as the environmental impact across the entire value chain.

Health Solutions: Clinic & Clinic Gas

Family of hospital headboards with a neutral, minimalist design, ideal for integrating in the space and giving centre stage to the light.

Clinic and Clinic Gas are luminaires that can be customized according to the needs of each project, with the possibility of direct, indirect and reconnaissance lighting, and with a wide range of mechanisms which are always integrated in the top or bottom of the profile in such a way as to be concealed. The Clinic Gas model, also allows the housing of the medical gas outlets in an independent channel, giving great accessibility and usability. This family of bed head units is designed both for hospitals and clinics, and for residences and health centres.

Seti

"More than just a sculpture"

More than an outdoor bollard, Seti is a vertical lighting system that was designed with the goal of covering an infinite number of constructive possibilities and lighting layouts.

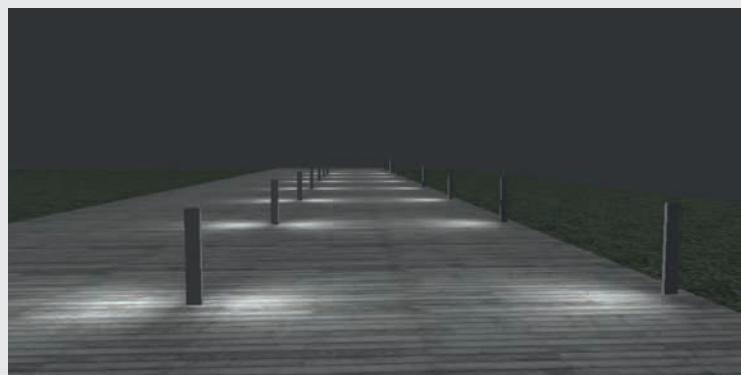

Design by Antoni Arola

Formal elegance

Dimensions reduced to the minimum expression, slim design with a section of 39mm x 120mm.

Wide range of lighting effects

Two lighting applications

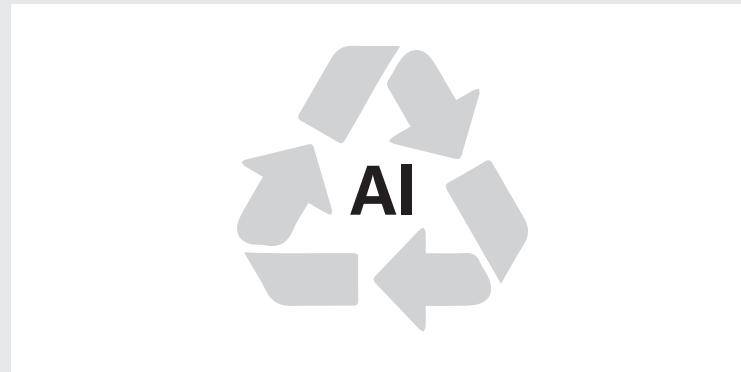

Individual: illuminates the horizontal plane unidirectionally.

Double: illuminates the horizontal plane bidirectionally.

Two optics options

Spot: illuminates on the horizontal surface with a high contrast on the illuminated and unlit surface

Soft: the product takes presence and generates a more blurred light on the horizontal surface.

#Worktitude For Life

Product made of recycled aluminium extrusion at a rate of 80-85%, reducing the carbon footprint of products and processes, as well as the environmental impact across the entire value chain.

Variety of finishes

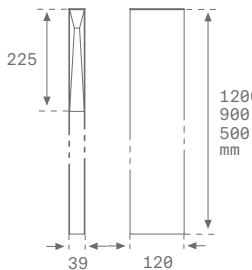

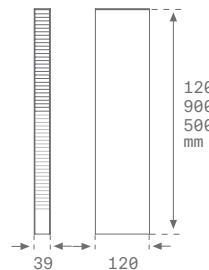

"Different finishes and combinations with white-black, and anthracite-black. Finishing of the different product in the internal and external part, which generates a differentiation in the perception of the different planes. Possibility to customize the color."

+ TECHNICAL INFORMATION

Ind.

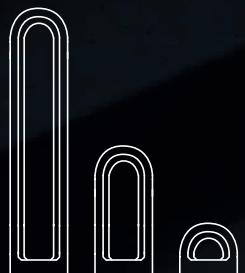

B-Side

"Disruptive technologies in product design"

A concept based on the idea that the object itself can collect the light that it generates, enhancing the product's character as an ambient element. The LED light allows for a lightweight design which is adapted for function, contributing to its aesthetic and functional value.

Design by Lamp

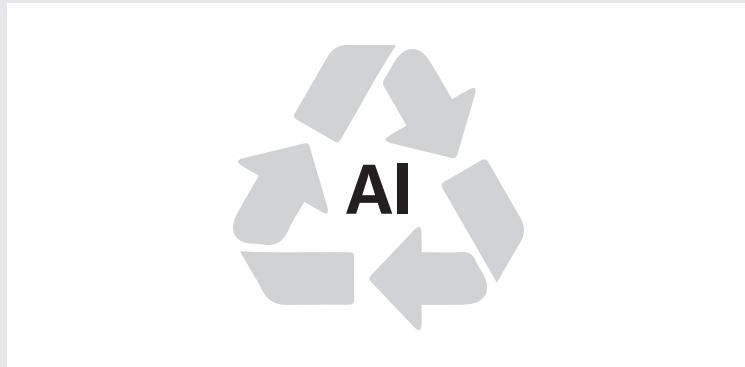

Versatile lighting effects

The B-side family enables the possibility of bollards with bi-directional lighting flush to the ground, also at different heights to bathe outdoor areas such as passages or routes. There is also a version with a 360° lighting effect.

Tamper-proof and anti-corrosion

Its robust construction (IK10 and IP65) makes it safe and solid for public spaces, as its structure remains intact in case of any outside impact or attack. This makes B-Side LED an excellent vandal-proof solution to light public parks, gardens and different urban areas. It is made of aluminium extrusion, injected, and lacquered in grey textured polyester. Its base has an anti-corrosion treatment, which enables to be installed on any type of surface.

#Worktitude For Life

Product made of recycled aluminium extrusion at a rate of 80-85%, reducing the carbon footprint of products and processes, as well as the environmental impact across the entire value chain.

Improved efficiency

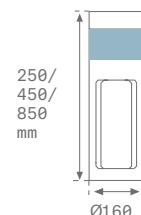

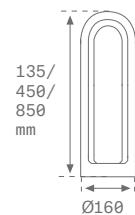

The second generation of B-SIDE beacons has achieved a 45% increase in initial efficiency. The B-SIDE 360° and 180° models are a highly efficient lighting solution for outdoor walkways, with up to 65lm/W. Exceptionally uniform illumination of your outdoor spaces while reducing energy consumption.

● Faro del Mayab Hospital, Mérida (Yucatán), Mexico

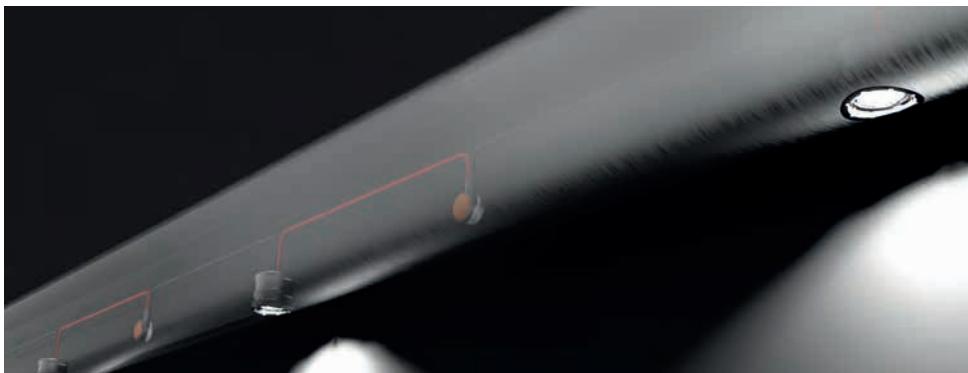

Puck

A concept based on the idea that the object itself can collect the light that it generates, enhancing the product's character as an ambient element. The LED light allows for a lightweight design which is adapted for function, contributing to its aesthetic and functional value.

Design by Wila

+ TECHNICAL INFORMATION

Lighting system for integration in railings

(round section)

Suitable for both indoor and outdoor installation

Durability and robustness

Corrosion protected stainless steel 316 V4A body luminaire;

Suitable for installation in marine environments;

IP66 rated for outdoor applications;

Vandal resistant IK10;

Lifetime of 50,000 hours (L80 B10);

Diversity of applications and lighting versatility

Stainless steel luminaire bespoke polycarbonate lens specially developed for handrail applications, various photometric distribution options (**Symmetric; Double symmetric; Asymmetric**)

Colour rendering index CRI > 80 and availability of colour temperature 3000K and 4000K.

Efficiency: up to 123 lm/W

Lup

*"Lighting designed to enhance
the environment"*

Under the same formal language, Lup Wall Mounted and Downlight provide both accent lighting and general lighting solutions for outdoor spaces, thanks to the optimization of their design that seeks to mimic the natural environment through greater light versatility.

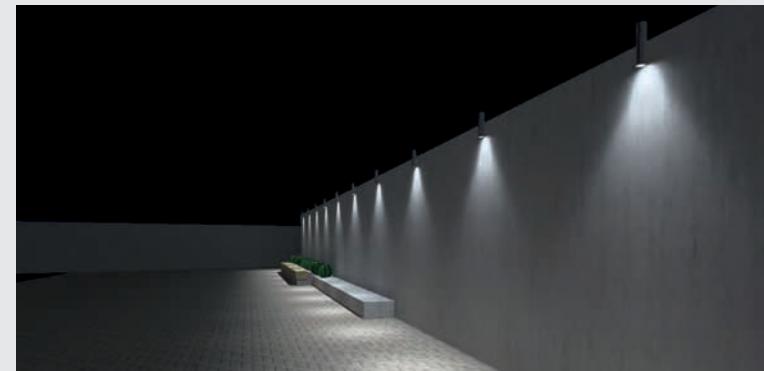

Design by Diba Studio

Versatility

A family of downlights and wall lights that follow the same aesthetic line and formal coherence, by covering different applications.

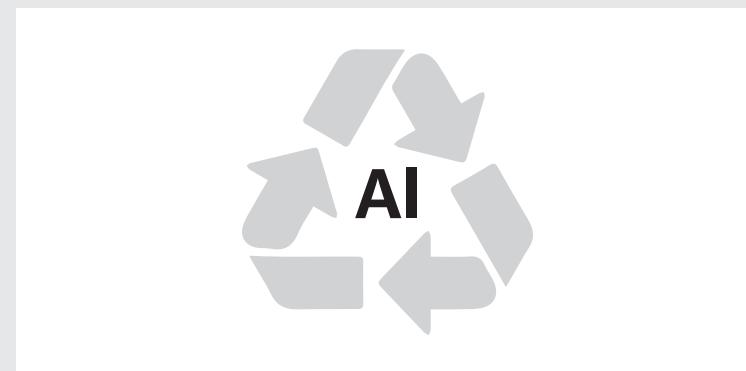

Versatile lighting effects: Symmetrical, Asymmetrical

Wall light available with direct and indirect lighting, or only direct lighting offers different optics; medium; spot and asymmetrical.

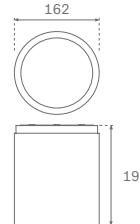

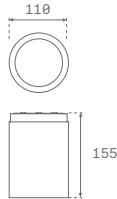

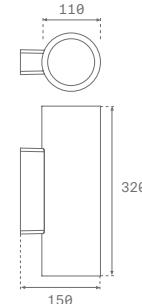

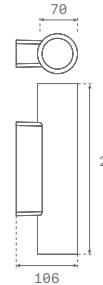

Compact design

Wall light with a minimalist, elegant and compact design, in which the joints disappear, reducing them as much as possible. This design enables perfect integration into any space.

#Worktitude For Life

Product made of recycled aluminium extrusion at a rate of 80-85%, reducing the carbon footprint of products and processes, as well as the environmental impact across the entire value chain.

● Madrid Offices, Spain

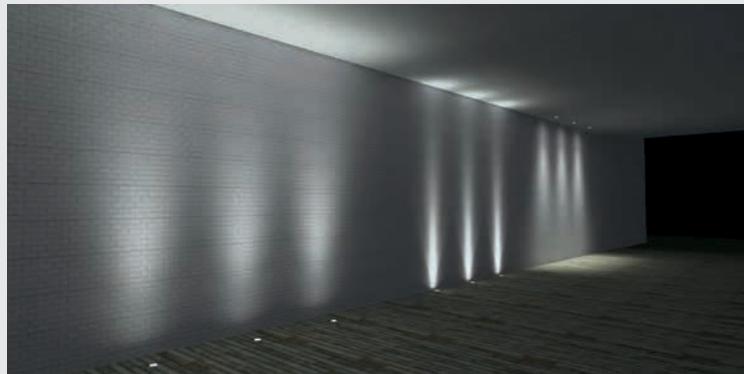

Gap

*"Architecture-enhancing lighting
for highly demanding applications"*

A project with an empirical design based on the study of spaces, minimising the height of the recessed light, and guaranteeing that watertightness does not depend on its installation, gave us the final model for this product.

Design by Diba Studio & Lamp

Versatile application: Uplight & Downlight

Special recessing ring to be installed in false ceilings with a decorative frame. It can also be recessed in floors and walls of shallow depth.

Compact: Height

Very compact design with a minimum recessing height, enabling this luminaire to be installed in multiple areas.

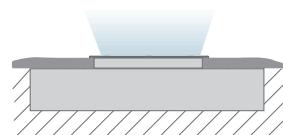

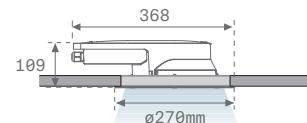

Adjustable Optics

Recessed adjustable uplight with tilting option to adjust the emitted light, and easy installation. This family can be used for spot, flood, and wide flood optics.

"Light reveals shape"

Searching for a way in which to illuminate spaces without the light source being visible, and taking inspiration from the light created by the moon during a solar eclipse, a new luminaire was created which reveals itself when it is turned on, creating a soft, diffused light that seems to come from within a line.

Duit

"Greater than the sum of its parts"

Scalable lighting programme around a lighting unit that, when combined with installation accessories and optics, creates an ecosystem of outdoor solutions with a holistic and environmentally friendly approach.

Design by LA INVISIBLE LAB

Highly versatile and configurable system:

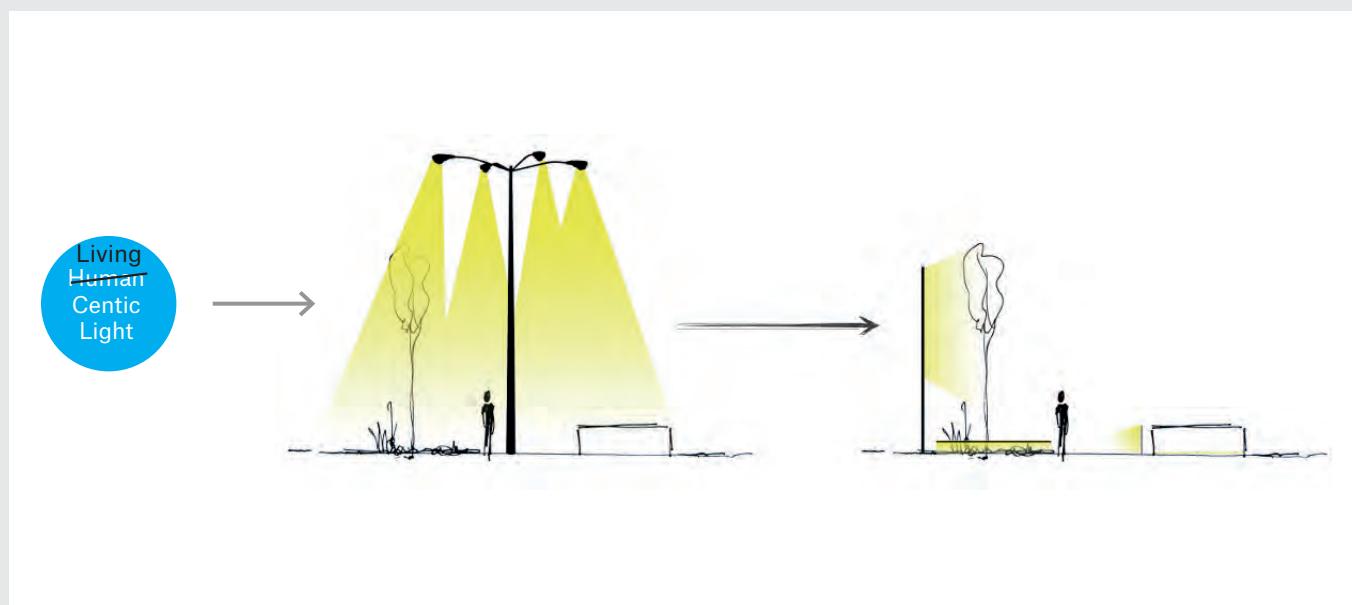

By selecting a lighting module with multiple photometry versions and combining it with different installation and optical accessories, DUIT becomes a lighting solution capable of meeting most of the lighting requirements of systems for architectural lighting (facades), user environment lighting, or pathway lighting.

Integration:

By optimising its dimensions, a high integration and interaction with any outdoor space can be achieved without compromising the technical aspects of the product. Thanks to its minimally intrusive anchoring systems, it can be installed in both new construction and renovation projects, reducing the visual impact.

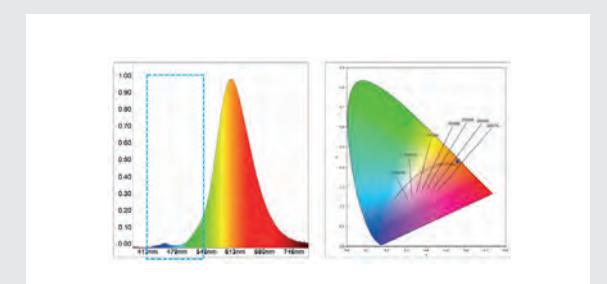

Scalable and separable system:

The range has been conceptualised to create a scalable solution that can be mechanically and technologically upgraded. Its piecemeal design facilitates sorting materials, which can then be recovered and recycled.

Lamp Worktitude for light

Living Centric light:
DUIT facilitates close lighting planning, bringing the light source closer to the action or element to be lit, thus creating much more pleasant lighting atmospheres, while reducing energy consumption. It has an amber option with a light spectrum that is extremely respectful of the environment and ecosystem.

Bazz

"Uniform lines of light"

Bazz is born from the need to provide uniform lighting and facilitate the installation of outdoor linear applications. It is a product with technical character and a broad range of options that provide concrete solutions to a wide variety of architectural applications.

Design by Lamp

Application versatility

This family is designed to provide solutions for different installation methods; both recessed and surface mounted. The end caps are made of aluminium injection and enable the luminaire to be inclined, to direct the light where it is most suitable in each application.

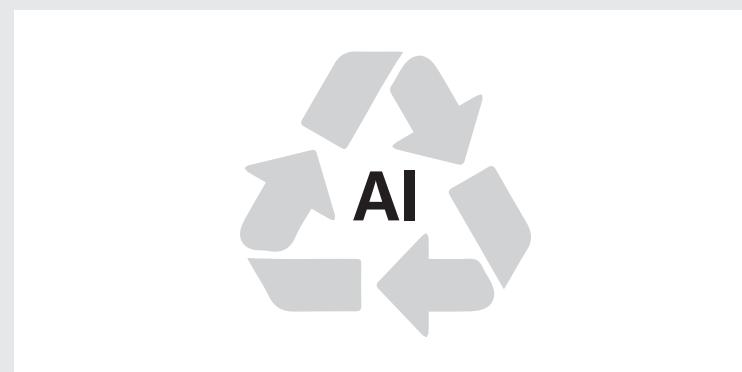

Continuous lines

In addition to the standard lengths, this luminaire is designed for installation in continuous lines and customisation of its lengths.

Ease of installation

Quick and watertight connectors on the end caps of the luminaire enable easy and convenient installation.

#Worktitude For Life

Flut

"Form follows function"

Flut is a clear example of the philosophy defended by the Bauhaus school and embodied in the famous phrase: "Form follows function." A family of products with a compact, neutral design and a wide array of solutions designed to simplify the installation process.

Design by Lamp

Multiple orientation possibilities

This family contains a ball joint to swivel between 90° and -30° in the desired direction, and contains an anti-condensation valve.

Wide range of accessories

It has a wide range of accessories, such as anti-glare fins, supports and clamps to create a Road System, with cone-shaped or cylindrical columns, ideal for lighting pedestrian areas.

Compact design.

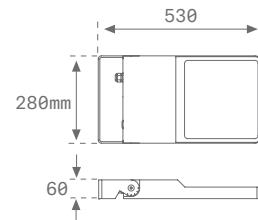

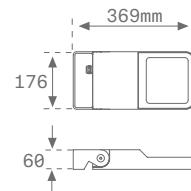

The compact design of this luminaire integrates maximum efficiency in a very small space, allowing minimum impact on the environment.

LUX: Mean horizontal lighting level. Generally calculated at a height of around 85 cm from the ground, always in working areas and level with its circulation or thoroughfare areas.

UGR: Internal Unified Glare Index Limit of the area. This establishes the direct glare onto each application depending on the distribution of the luminaires vis-à-vis the features of the area to be lit up and the observation point of the operators.

Ra: General colour rendering index of light sources.

Technical General Information

PICTOGRAPH

	Luminaire in which protection against electric shocks is based, in addition to the main insulation, upon the earthing of accessible conductive parts.		CE self-certification.
	Luminaire in which protection against electric shocks is not based upon the main insulation, but rather upon complementary safety measures such as double insulation.		Luminaire without required control gear built-in.
	Luminaire in which protection against electric shocks is based on a very low safety voltage.		TRIAC Trailing edge
	Luminaires should never be covered with any heat insulating material.		Outdoor luminaire for under canopy installation.
	Maximum adjustment angle of the luminaire.		Luminaire not including end covers.
	Maximum adjustment angle of the luminaire.		1m HO7RN-F (3x1,5) hose included.
	Maximum adjustment angle of the two axes of a gimbal luminaire.		Luminaire designed for double switching.
	Luminaire with built-in glass.		Anod.: Anodized: Electrolytic passivation process which objective is to protect against corrosion.
	Stainless Steel.		Classification Risk 0 (Exempt group) according to EN62471
	Polycarbonate body.		Recycled polycarbonate body.
	Aluminium body.		Recycled aluminium body.
	Electro coating. Painting process which objective is to protect against corrosion.		Luminaire with dynamic white light source (2700-6500 K)
	Material which has successfully passed the incandescent filament test at the indicated temperature.		Suitable for saline environments.
	Floor aperture diameter.		Unified Glare Rating <19 (Dimensions 4H8H Refl: 70/50/20)
	Ceiling aperture diameter.		Wellbeing Technology
	Rectangular ceiling aperture dimensions.		PMMA DIFUSER Methacrylate Diffuser
	Maximum panel thickness for luminaire anchoring point.		Active Cooling. Model which incorporates active dissipation.
			DALI control gear.

Technical General Information

IP CODE

In agreement with the norm EN 60598-1, the luminaires are classified according to the derived protection of its constructive elements. The nomenclature comes symbolised by the letters IP followed of three figures, although the two first ones are indicated.

1st figure

Protection of the material against the filtration of solid elements and dust, as well as to the people in respect to the tension of the components of the luminaire.

- 0 - Not protected.
- 1 - Protection against solid bodies bigger than 50 mm.
- 2 - Protection against solid bodies bigger than 12 mm.
- 3 - Protection against solid bodies bigger than 2,50 mm.
- 4 - Protection against solid bodies bigger than 1 mm.
- 5 - Protection against the dust.
- 6 - Complete protection against the dust.

2nd figure

Protection of the material to the penetration of liquid.

- 0 - Not protected.
- 1 - Protected against steady dripping.
- 2 - Protected against falling water to a maximum 15°.
- 3 - Protected against rain.
- 4 - Protected against sprays.
- 5 - Protected against water jets.
- 6 - Protected against waves.
- 7 - Water-tight immersion.
- 8 - Water-tight against immersion.

IK CODE

Code system which indicates the degree of protection given by a body and the protector against harmful mechanic impacts.

SPECIAL COLORS

Different colors from the ones settled on the price list are considered as **special executions**. Enquire for price and delivery time.
When applied, there may be small differences between the original colors and those obtained on certain final products.

Attached to ECOTIC Foundation for the Environment, applying the Community Directive 2002/96/CE RAEE'S, for recycling waste from electrical and electronic lighting devices. The ECORAE economic management cost of luminaires is borne by Lamp. As regards the Lamps included in some of our luminaires, they shall be subject to the ECORAE rate charged to us by the manufacturer.

The following conditions for the return of lighting materials shall be applicable to Lamp S.A.U.'s supplies:

- 1º All returns not due to manufacturer's error must be previously authorised by the company.
- 2º Returns of special material, that is to say, outside the current price list shall not be accepted.
- 3º All returns shall always make reference to the invoice and/or delivery note, with which they were supplied.
- 4º Under no circumstances shall any material that is more than 90 days old, according to the supply invoice date, be admitted for return.
- 5º In the event that the return of a material is expressly accepted, this shall be in its original packaging, in complete boxes, unopened and in good condition, as if it were a new product.
- 6º The return of the material shall be made carriage paid and at the client's expense and risk.
- 7º Payment regarding any authorised return shall entail a minimum depreciation of 15% of the net amount of the invoice.

General Terms and Conditions of Sale

The acceptance by **LAMP S.A.** of any order implies complete acceptance by the purchaser of these General Terms and Conditions of Sale.

1. Prices

Prices shall be those applicable at the date of receipt of the order, applying agreed discounts. A specific quotation must be sought for out-of-catalogue and specially-executed articles.

2. Order confirmation.

The client must check the confirmation for the order submitted within 72 hours. The Client shall be solely responsible for the accuracy of the order, including specifications, configuration or other requirements of the Products and Services. They shall also be responsible for checking the functionality, compatibility with control systems and interoperability with other products not supplied by LAMP, as well as the suitability for a particular use. The Client guarantees that the information provided to LAMP is complete, accurate and true, and the Client further acknowledges that failure to provide complete, accurate and true information or instructions to LAMP may impair LAMP's ability to perform its obligations or exercise its rights under an Agreement.

3. Deliveries

The place of delivery of the material ordered and thus that of the associated sale, is always deemed to be our factory or storage facility (ex-works). Goods thereafter travel at the purchaser's own risk and expense unless the order is accepted on a carriage paid basis. The risks relating to product return will always be assumed by the purchaser. In the event of serious difficulties, LAMP will cover the orders depending on their possibilities.

4. Delivery period

To provide our customers with guidance on likely availability of product in our warehouse, we have classified our products as follows:

- Guiding availability term: **1 week** (from the date of the formalization of the order)
- Guiding availability term: **2 weeks** (from the date of the formalization of the order)
- Guiding availability term: **to be determined by LAMP** (from the date of the formalization of the order)

The blue dots ● are indicated before each product code.

Confirmation of delivery periods must be sought for each order. All these terms can be increased in one day due to the expedited process. **LAMP S.A.** shall not be answerable nor liable for any penalty in the case of failure to meet such delivery periods.

5. Transport

Unless agreement is reached to the contrary, carriage shall always be borne by the purchaser.

The recipient shall have a duty to examine goods upon receipt and place on record any problems on the goods delivery note or make a claim with 48 hours to their transport agency if sent on a carriage forward basis, or to Lamp, if made on a freight paid basis.

6. Cancellation of orders

All cancellations of orders must be made in writing. Should cancellation occur after delivery of an order, it will be treated as a return, the procedure for which is governed by Clause 9. Specially-executed orders cannot be cancelled when production thereof has already commenced.

7. Samples

All samples of materials must be requested by means of an order and shall be invoiced. When returned, they shall be credited in full unless damaged or modified.

8. Specially-executed orders

Specific inquiries of any out-of-catalogue must be made prior to an order being placed to ascertain its viability, price and delivery period.

9. Lighting projects

We are happy to offer all our customers the free service provided by our **Technical Projects Department**, which can carry out a lighting calculation study.

Together with the technical report, you will receive a lighting quotation and plan to assist with the implementation of the works. You can also request, free of charge, our lighting calculation program on CD.

10. Returns

LAMP S.A. will accept returns of all those goods marked in the price list with a symbol ● (a single blue dot).

• Required procedures:

- Customers must have made the original order in writing (fax, e-mail, letter, etc.)
- They must request a return merchandise authorisation (RMA) number from **LAMP S.A.**
- The relevant goods must not be damaged in any way.

• Return deadline:

- RMA numbers must be requested within 90 calendar days of the date of shipment of the relevant goods.
- Returns must be made within 30 calendar days of the date of receipt of the RMA number (which **LAMP S.A.** shall notify in writing).

• Conditions:

- **LAMP S.A.** shall be entitled not to accept any return, whatever the reason therefor, in any of the following cases:

- Breach of required procedures and/or deadlines.
- Out-of-catalogue items.
- Specially-executed orders (non-standard electrics, measurements, etc.)
- Goods painted in non-standard colours.
- Goods marked in the prices list with the following symbols: ●● (two blue dots) and/or ●●● (three blue dots).

- All duly-authorised returns shall be sent to **LAMP S.A.** carriage paid.

• Credit notes:

LAMP S.A. shall issue credit notes for all returns which meet each and every one of the above requirements in respect of procedures, deadlines and conditions for 85% of the originally-invoiced sum. The remaining 15% shall be set aside to cover the costs in respect of the return (handling, packaging, quality control...).

Credit notes arising due to causes other than returns (differences in prices, carriage, errors, etc.) shall also be subject to the above procedural and deadline requirements, that is, the original order must be made in writing and the related claim must be made within 90 calendar days of the date of issuing of the invoice.

A further prerequisite is that customer is fully up to date with all its payment duties.

11. Quality

All products supplied by **LAMP S.A.** have received CE certification, meet other standards and regulations and have been subject to strict quality controls which guarantee their proper working.

LAMP S.A. is continually working to improve and update its products. It therefore reserves the right to change, withdraw or expand its products without prior notice and without this giving rise to the right to make any form of claim or complaint.

12. Warranty

LAMP S.A.U. guarantees the perfect working order of each and every one of its products against any defect in relation to materials or labour involved in the manufacture of the same. The commercial warranty provided by **LAMP S.A.U.** is an extension of the mandatory six-month legal warranty (Law 23/2003) and is specified as follows: The warranty for LED products featuring the "5-year warranty" tag on the technical data sheet is extended to 5 (FIVE) years, and to 2 (TWO) years for all other standard products, valid as of the date of delivery. Furthermore, the warranty period for the repair or replacement of lamp products is extended to the 2 or 5 years specified in this legal warranty extension. The scope of the Lamp warranty covers all Spanish and international territory. The corresponding claim should be delivered to our commercial department in writing in order to render the warranty valid. Our warranty includes the repair, replacement or exchange of the product and/or components at no cost to the customer, excluding labour, in addition to transportation costs arising from compliance with the warranty. All the technical specifications of the Lamp warranty, in addition to the rights of the consumer, are set forth in the General Warranty Conditions document: <http://www.lamp.es/files/64880>.

13. Reservation of title

LAMP S.A. reserves title over all the goods it supplies until the purchaser has paid for them in full.

14. Jurisdiction

In the case of any disagreement or dispute over these General Terms and Conditions of sale, both parties, expressly waiving any other jurisdiction, submit themselves to the authority of the Courts and Tribunals of the city of Terrassa (Barcelona).

NB: This document replaces all previous versions. Data valid for orders received from February 1st 2021.
